AUTOMOBILE MIXUP ON MISSION STREET

Mission street, in front of Fire Chief Kennedy's home, was the scene Wednesday night about 7:30 of one of the worst automobile mixups of the year.

Elmer Kennedy was backing his car out of the garage onto the highway when George Bertucci, accompanied by Hermon Lorenz, in the former's roadster, crashed into him and overturned both cars.

While Chief Kennedy, Mr. Ratto, Mr. Lorenz and other willing helpers were straightening this affair out, a motorcyclist driving south was struck by a Ford coupe, headed north, and dragged for a distance of twenty feet. The driver of the Ford, Nick Gill, took the injured man to the South San Francisco hospital and paid all hospital costs.

Immediately afterward a big Hudson sedan, headed south and driving carefully to avoid the tangle, threw off a hind wheel just as one of the spectator's cars which had been left at the curb without occupants concluded to loosen its own brakes and headed down the highway, gaining speed at each moment. Mr. Sellers chased it like a champion sprinter and, climbing in, steered it to safety and a standstill just a yard before it crashed into another car parked in front of the high school.

Chief of Police Doyle arrived on the scene immediately after the motorcyclist was hit and took charge of the situation capably, preventing by his coolness and command any further difficulties.

Fire Chief Kennedy drafted all of the available young men, produced brooms and in a few minutes what had been like an explosion in a glass factory was as clean as before the mess started.

The Bertucci and Lorenz boys were both cut and slightly injured by their nose dives from the roadster.

Elmer Kennedy's car, which had just had a thorough overhauling, lost a rear wheel and all of its glass on one side. The Ford coupe was slightly injured in its steering apparatus.

The only serious injury was to the motorcyclist, Andrew Flintoski, 22 years, of the Ship Hotel, South San Francisco. He suffered a fractured skull. Everything possible was done for him by Mr. Gill, driver of the car which hit him.

Marshal Doyle has charged Messrs. Bertucci and Gill with reckless driving. He intends to stamp out the speeding and reckless driving so prevalent along Mission street.

CITY ELECTION WILL BE HELD ON APRIL 12

The city election will be held on Monday, April 12, when three city trustees will be elected. Three of the present trustees, Thos. P. Moran, T. F. O'Rourk and H. H. Smith are candidates for re-election. Philip Ross is also a candidate.

The terms of Henry Sundermann and A. J. Bodien do not expire for two more years.

City Treasurer A. L. Stockton and City Clerk B. C. Ross hold office for four years, and will not come up for re-election until 1928.

PLEASANT BIRTHDAY SURPRISE PARTY

Mrs. T. Crowley, of Sears street, gave a very pleasant birthday surprise party to her husband last Saturday evening at her home. The many friends present enjoyed themselves dancing while two accordian players furnished the music. Everyone enjoyed the old-time dances, such as the Virginia reel, lancers, Highland fling and three step polkas. Singing and recitations were also indulged in. At midnight everyone marched to the dining room, where a delicious supper was served. Mr. Tracey and Mrs. Sheila Coen gave many toasts during the supper. Mrs. Annie Neylon, who has a fine soprano voice, sang many popular songs. Mrs. Neylon is past president of the David Scannell Club.

Mr. Crowley received many useful presents and good wishes. The party didn't break up until the wee sma' hours of the morning.

Among those present were Mrs. Annie Neylon, Mrs. Helen O'Connor, Mrs. Begley, Mrs. Sheila Coen, Mrs. McKenna, Mrs. Scramaglia, Misses Elizabeth Neylon, Loretta Thomas, Thelma Fibres, Lillian Flarery, Tessie Begley, Anna Crowley and Nellie Crowley; Messrs. T. Crowley, T. Tracy, T. Dougherty, J. La Rose, P. Froen, T. O'Roney, P. Murphy, P. Canlon, B. Morrissy, W. O. Regan, F. Crowley, J. Harrington, J. Crowley, A. Johnson F. Flores, J. Scramaglia, Miss Scramaglia and the hostess, Mrs. T. Crowley.

PLAN IMPROVEMENT IN SIDEWALKS ON MISSION

At the regular meeting of the city trustees held last Monday evening the light committee made a report on the light situation on Bepler street and recommended that new lights be installed.

The city purchased a lot adjoining the pumping station, at Niantic street and Citrus avenue. A well is being completed on this property, which will add to the already excellent water supply of this city.

Report was made by the city engineer that the San Francisco street department had started proceedings to complete the sidewalk on Mission street between the Daly City line and Acton street.

The Pacific Gas and Electric Company was given permission to install poles in different sections of the city for additional lighting service.

A communication was received from the Veterans' Welfare Board, asking tax exemption on certain property, and the matter was referred to the city attorney, to report at the next meeting.

The street committee reported progress in the plans for the widening of Mission street and San Jose avenue. Chairman Smith and Assistant Engineer Klassen were to meet with the representatives of the Highway Commission and the San Francisco engineering department Tuesday morning.

FORMER RESIDENT ANSWERS SUMMONS

A requiem mass held at St. Bruno's church, San Bruno, featured part of the beautiful funeral services Wednesday morning for the late Albert E. Costa, husband of Irene Costa, nee Devlin, formerly of 52 Willits street, Daly City. Mr. Costa passed away following an illness of long duration, contracted while serving in the U. S. army. He was 26 years of age and was a native of South San Francisco, and was one of the most popular young men on the peninsula.

Several hundred true friends paid their last respects and followed the flag draped casket to its last resting place.

Besides leaving a wife, Albert Costa leaves a loving father and mother, Mr. and Mrs. Antone Costa, and three sisters, Mary, Agnes and Mable, and three brothers, Henry, Seman and Edward. Interment was in the Holy Cross cemetery.

HEAD OF DE MOLAY TO TALK TO BOYS

Candidates and prospective candidates of the De Molay Chapter are invited to attend a meeting at the Masonic Hall, Daly City, next Tuesday evening, March 30, after 9 o'clock.

Jesse Witehead, head of the De Molay organization for the Pacific Coast, will be present and will make an address which undoubtedly will be of much interest to the young men.

Final arrangements will be made at this time for the institution of the De Molay Chapter in the Jefferson Union high school auditorium on Saturday evening, April 3. The institution ceremonies will be open to the public and parents as well as the boys interested are cordially invited to be present.

BUILDING PERMITS ON THE INCREASE

The following building permits were issued last week by B. C. Ross, city clerk:

J. Jensen, three rooms and store building at 167 Los Banos avenue.

W. F. Hughes, four rooms and garage at 214 Alexander street.

Gus Blomquist, five rooms and garage at 258 Winchester street.

Messrs. Jeffers, Tuene & Wiseth, five rooms and garage at 363 Evergreen avenue.

Messrs. Jeffers, Tuene & Wiseth, five rooms and garage at 357 Evergreen avenue.

Messrs. Jeffers, Tuene & Wiseth, five rooms and garage at 339 Evergreen avenue.

Messrs. Jeffers, Tuene & Wiseth, five rooms an garage at 327 Evergreen avenue.

GIRL RUNS IN FRONT OF SPEEDING AUTO

While driving south Wednesday afternoon, Zello Nichols, of 602 University avenue, Palo Alto, struck little Perry Scalia, of 6045 Mission street, when the latter ran suddenly from behind a parked machine. The accident seems to have been entirely unavoidable on the part of the driver of the machine. The little girl was only slightly dazed.

MENLO PARK FAVORS CONSOLIDATION PLAN

Unification of San Francisco and San Mateo counties in a great residential and metropolitan area will be sought by the Menlo Park Chamber of Commerce, it was announced following a meeting of the board of directors of the organization. A complete program with unification as the aim was adopted at the session. The plans include:

Extension of the San Francisco Municipal street car system down the peninsula as far as Menlo Park.

Completion of the Bay Shore highway to San Jose.

Extension of the Western Pacific to San Francisco.

Incorporation of Menlo Park as a separate municipality.

Hetch Hetchy water for San Mateo county.

In the resolutions for consolidation passed by the chamber, it is stated: "Our reason in launching this movement is for the purpose of securing an outlet for the rapidly expanding growth of San Francisco to the southward, where the people may avail themselves of the ideal suburban home conditions and yet remain within the borders of San Francisco.

"It is through the combined efforts of the residents of the peninsula that its basic problems, such as adequate water supply and transportation facilities, can best be worked out, and for that purpose we recommend that all civic organizations and public-spirited citizens living in the peninsula meet at an early date for the purpose of devising ways and means of bringing about consolidation. The Menlo Park Chamber of Commerce stands ready to co-operate in every possible way."

WILL ADVERTISE CITY ON TRIP TO THE NORTH

J. L. Vasey, proprietor of the Mission Auto Camp, is leaving tomorow for a trip to the state of Oregon. Mr. Vasey is going to combine business with pleasure and he declares that Daly City will get a great deal of boosting all along the line. He expects to be away for some time, and on his return will be in readiness to handle the tourist traffic from various points which he expects at the camp. Great improvements have been made at the camp for the convenience of the campers who will stop there this summer.

SERMON LECTURE AT GRACE CHURCH

Next Sunday evening there will be delivered at the Grace Presbyterian church by the Rev. Charles H. Gatchell a sermon-lecture on "The Passion Play of Oberamergau, Germany." It is free. Come and hear about one of the world's greatest actors.

We are preparing for a real resurrection Easter program. A fine class have accepted Christ and decided for the right and will unite with the church on that day. Special music and a program is being arranged by the Sunday school.

The Christian life is like an airplaine; when you stop you drop.

"I should like to see America a religious nation; I wish every man in America would attend church."—President Harding.

The church has many forms, but one mission.

Christ has no hand but our hands,
to do his work today;
He has no feet but our feet, to lead
men in His way;
He has no tongues but our tongues,
to tell men how He died;
He has no help but our help, to
bring them to His side.

What if our hands are busy with
other work than His?
What if our feet are walking where
sin's allurement is?
What if our lips are speaking of
things His lips would spurn?
How can we hope to help Him and
hasten His return?

—Selected

The church is still God's institution, set in the world for the helping of those who are downcast and discouraged, and we hereby plead for the support and help of the community that we may make it the beacon light for which it was established.

CHARLES H. GATCHELL,
Minister.

COUNTY FIREMEN HOLD MEETING IN BURLINGAME

Representatives of the fire departments of cities throughout the county met at the city hall in Burlingame last Tuesday night at the regular monthly session of the Associated Fire Departments of San Mateo County. Members discussed routine business and adjourned to meet next month in San Bruno.

RECALL ELECTION IS ORDERED BY COURT

After a journey through the Supreme Court, the Appellate Court and the California State Supreme Court, the South San Francisco recall election case reached the end of its trail Monday when the Supreme Court denied a rehearing on the appeal and ordered that the election be held forwith.

The suit was started early this year when D. W. Ratto of South San Francisco appealed to the Superior Court for a writ of mandate compelling the South San Francisco trustees to call an election for the recall of three members of its body.

After Ratto obtained judgment, the three trustees took the case to the District Court of Appeals, which held the case up while it asked Judge George H. Buck in the Superior Court at Redwood City to take testimony on the facts. The Appellate Court then sustained the judgment of Judge Buck and ordered the election held.

Another appeal was taken to the Supreme Court in which it was asked to order a rehearing. The decision announced in San Francisco Monday morning denies the petition for rehearing and again orders the election held.

The city trustees of South San Francisco, under the order of the Supreme Court, will be required to meet next Monday night and set a date for the election not less than thirty-five and not more than forty days from March 29.

The three trustees against whom the recall is directed are Mayor F. H. McNellis and Trustees Carl Blank and Hugh McCaffrey. On April 12, next, Trustees Al Eschelback and Fred Cunningham will come up for re-election.

PESCADERO PARTLY WIPED OUT BY FIRE

Nearly half the town of Pescadero was destroyed by fire last Saturday night, the damage being estimated at $150,000, the loss being only partially covered by insurance.

The death of J. C. Coburn, aged 90, occurred during the fire, the aged man dying as he was being moved from his home in the path of the flames.

The fire started in the terminal of the Coastside Transportation Company when Claude McCormick attempted to fill the gasoline tank of his truck. He was using a lantern, a few drops of gasoline splashed on the lantern and an explosion immediately followed.

Failure of the fire pump and apparatus at the critical moment was responsible for the heavy loss.

Hundreds of citizens formed a bucket brigade and extended in a line from the outskirts of the fire to Pescadero creek. They succeede in preventing the fire from spreading beyond the eight business houses extending along San Gregoria avenue from the corner of Main to the home of J. C. Williamson.

Rebuilding plans now occupy the attention of the merchants who suffered by the fire. The fire has also crystallized sentiment in favor of the incorporation of the city, it is said, and the formation of a volunteer fire department with adequate fire fighting facilities.

SAN FRANCISCO MUST PAY FOR PUPILS AT COLLEGE

The city and county of San Francisco must pay the San Mateo Junior College district tuition for students who reside in the metropolis and attend the San Mateo college because of the fact that San Francisco has no such institution. This was determined last Friday in an opinion to the finance committee of the San Francisco board of supervisors by City Attorney John T. O'Toole.

The San Francisco board of supervisors had refused to pay the tuition, amounting to $5,540.80, on the grounds that it was the responsibility of the board of education. The latter body had taken the stand that the bills should be met by the supervisors. The opinion by O'Toole fixes the responsibility upon the board of education.

OPENS REAL ESTATE OFFICE

A. J. Dalton, who for many years has been a resident of Daly City, has opened a real estate office at 5378 Mission street. He is very well known in Daly City, having formerly been in the real estate business here in the early days. On the opening of his new office he was presented with a beautiful horseshoe floral piece from Thomas Jefferson of the Thomas Jefferson Cleaning Works. Mr. Dalton is very optimistic as to the future of Daly City, he having recently turned over some big deals. His friends all wish him success in his new location.

MENLO PARK VOTERS TO DECIDE ON INCORPORATION

On April 19, citizens of Menlo Park will go to the polls to vote on the question of incorporation of that community. This was the date fixed by the supervisors at their meeting in Redwood City last Monday, following the presentation of a petition asking the election. Two polling places were designated by the supervisors.

Much routine work was transacted by the supervisors at the Monday session, representing the accumulation of matters while the members were in attendance at the state convention of county supervisors at San Diego.

A petition was presented for the abandonment of certain unused streets in Belmont, and April 19 was set as the date for hearing any protests in the matter.

The district attorney presented an opinion on the subject of branch libraries which contended that while the county could legaly rent a suitable building for such purpose, it was without authority to expend any money for the hire of assistant librarians to attend the branches.

The board agreed to visit the County Memorial Park with the Boy Scouts on April 3 to select a camping site for the use of the Boy Scouts of the county.

Attorney Lee T. Ross presented the proceedings and returns of the recent high school and junior college bond elections, and requested that the supervisors arrange to advertise for bids and sell the bonds as quickly as possible, to permit the high school trustees to proceed with the construction work of the new school without delay.

County Surveyor George A. Kneese was instructed to prepare plans and specifications for the scarifying, oiling and screening of the San Gregorio creek road from the town of San Gregorio to the line of the Third township.

A petition was presented for the establishment of a public road 70 feet wide as a connection between the highway and Dumbarton bridge on Willow road. George A. Kneese, D. E. O'Keefe and H. C. Tuchsen were named as a board of viewers to determine the status of the road, and the petition was ordered submitted to the State Railroad Commission for permission to establish a grade crossing over the tracks of the Southern Pacific Company at their intersection with the road.

Frank C. Towns filed his report of the estimated cost of the San Mateo-Alvarado bridge, showing a total cost of $11,500,000.

Supervisor C. V. Thompson suggested that an electrically lighted sign be placed on the state highway to designate the road to the Community hospital. The district attorney was instructed to write to the officials of the United States Laundry and request them to cease parking their trucks on the highway at this point.

The Great Western Power Company reported that they would rush the installation of the new lights recently authorized in the Half Moon Bay lighting district.

A number of applications for soft drink licenses were received and filed for hearing on April 6.

YOUTH SUPPOSED DROWNED SAYS HE WAS KEEPING DATE

After eleven shots of dynamite had been set off in Searsville lake, near Woodside, in an attempt to recover the body of Raymond Wooliever, 19 years old, of San Francisco, the young man walked into his home Tuesday night and told his folks that he "had a date" with his best girl, and was afraid his brother would prevent his keeping it, that being the reason he had departed from the lake without notifying any one of his intentions.

When he and his brother and sister went to Woodside for a Sunday outing, young Wooliever took along an extra jumper and a pair of trousers. The three went down to Searsville lake Sunday afternoon for a swim. Raymond left his old clothes in the bath house and when his brother and sister were not looking, slipped back into the dressing room, put on the extra jumper and trousers and left for San Francisco. When the clothing was found, it was supposed he had been drowned, and a twenty-four hour search and the dynamiting of the lake followed.

Another New Building for City

Excavating is now in full swing alongside the St. Maximus church, and rumor has it that another large building will be erected there in the very near future. Another indication of the steady progress being made in Daly City.

Have You Lost Your Keys?

A bunch of keys has been found in Daly City. The owner can have same by calling at the office of City Marshal Doyle, at the City Hall.

DETENTION HOME HEAD IS REMOVED

Mrs. Katherine Haw, for many years superintendent of the San Mateo county detention home at Redwood City, and Mrs. Paulsell, her assistant, were ousted from their positions last Monday by the board of supervisors, in session at Redwood City. The ouster order, which had the unanimous support of the supervisors, will take effect on March 31.

It is claimed that Mrs. Haw had been somewhat of a storm center in county political circles for some time. The matter came to a climax last Saturday when Chairman John MacBain of the board of supervisors learned that she had decided to go on a vacation and had apparently departed for the south without asking the permission of anyone, placing her assistant in charge of the detention home as acting superintendent.

Miss Flo Kreiss, county school nurse, was named as head of the detention home to succeed Mrs. Haw. No successor was appointed for Mrs. Paulsell, but action in this matter will probably be taken at the first meeting of the board to be held in April.

The motion to declare the two positions vacant was made by Supervisor C. V. Thompson of Pescadero, and was seconded by Supervisor Manuel Francis of Half Moon Bay. All members present voted in favor of the ouster order.

PUBLIC SCHOOLS WEEK OBSERVED APRIL 26-30

In a statement issued by Mrs. Hugh Bradford of Sacramento, the 123,000 members in California of the various Parent-Teachers' Associations were urged to co-operate to make successful the seventh observance of public schools week, April 26 to 30. Mrs. Bradford is the state president of the California Congress of Parents and Teachers, popularly known as the Parent-Teachers' Association.

At headquarters in San Francisco of the state committee having charge of the annual observance, it was declared that the early responses indicate the most successful annual week held since public schools week was instituted by the Masonic Grand Lodge seven years ago, in order that the public might be kept informed as to school activities, methods of instruction, curriculum, etc.

The meeting this year will be held in school auditoriums and public halls, as was the procedure last year, the week having so gained in interest that it was necessary last year to throw the meetings open to the public in general, and especialy to the parents of the school children.

The California organizations of parents and teachers is the largest organization in the world of parents of school children organized around their local schools for the interest of the children.

SOUTH SAN FRANCISCO OFFERS AIRPORT SITE

A site for a combined San Francisco municipal airport and United States air mail flying field has been located near South San Francisco, and will be presented to the San Francisco supervisors and government officials within the next few days, according to an announcement made at the offices of the South San Francisco Chamber of Commerce.

The site selected consists of 100 acres and is located between South San Francisco and San Bruno. It is between the new Bay Shore highway, now under construction, and the old Bay Shore road, and is within easy access of the Southern Pacific and Market Street Railway lines, being only 17 minutes from Third and Townsend streets, San Francisco.

The field has been inspected by a number of noted aviators, including Colonel F. P. Lahm, commandant of Crissy Field, and has been pronounced suitable for aviation purposes. At a nominal cost it could be graded, it is claimed, and placed in first class condition. To make it thoroughly safe, it is proposed to have the high tension lines of the Pacific Gas and Electric Company constructed underground at this particular point.

Under the plan proposed by the South San Francisco Chamber of Commerce, the land would be turned over to a joint commission. The improvement work would be done at the joint expense of San Francisco, the government and the individual commercial firms using the airport.

Lands Nice Business

The Thomas Jefferson Cleaning Works was awarded the cleaning of all garments that were damaged by smoke and fire as the result of a fire in an apartment house on Green street, San Francisco. The order amounted to several hundred dollars and was paid by a San Francisco insurance company.

Colma News Notes

By SYLVIA HAUBRICH FISCHER

The children of the R. S. Thornton school enjoyed a hike last Thursday.

Lombardi Brothers have purchased a fine new truck for their hog business.

Jack Rose is in the South San Francisco hospital with blood poisoning in his hand.

A whist party will be given for the benefit of the Colma Community Center the first Saturday in April.

Miss Josephine Jensen, of Lawndale, returned home Monday from Los Angeles, after a delightful trip, made by boat.

Water is being piped to all the lots in Jefferson Park. It is said that nearly all of these lots have already been sold.

Mr. and Mrs. Jerry Horkey recently visited Thomas Schmidt, who is in the South San Francisco hospital with a blood poisoned hand.

Mrs. B. W. Haubrich, Mr. and Mrs. Stephen Fischer and Bennie Haubrich motored to La Honda last Sunday and spent the day with Frank Silva of the La Honda Stock Farm.

Miss Louise Merlo, of Vale street, spent last Wednesday in San Francisco.

Mrs. H. Denman, of Pedro valley, was in town visiting friends recently.

Mr. and Mrs. E. Maffei, of Lomita Park, visited Mrs. B. W. Haubrich last Monday.

Mrs. Julia Sturla is getting along nicely after her accident, and is under the care of Dr. Oschner.

Mrs. Jack Callan, Mrs. Earle Jones, Misses Louise Silicani and Gladys Callan spent last Monday in San Francisco.

An enjoyable St. Patrick's dance was held by the Jefferson Union high school student body in the auditorium last Friday evening.

Mr. and Mrs. Earle Jones, of First avenue, were dinner guests of Mr. and Mrs. Lowans, of San Francisco, last Tuesday evening.

Mrs. Bert Sturla, of Coursing Park, tendered her daughter, Miss Alberta Sturla, a delightful party last Saturday afternoon, the occasion being her birthday.

Harold Varni will have charge of the April whist party and dance to be given for the benefit of the Colma Volunteer Fire Department, early in April. Watch these columns for the date.

The play "Welcome Home Jimmy," which was recently presented by the members of the Santana and Santangelo Clubs for the benefit of the Holy Angels' church, will probably be presented by these players in Morgan Hill in the near future.

Mrs. Joseph Franzoia, of Price street, and brother Louis Varni; Mrs. L. Re, Mrs. M. Fisicaro and sons Angelo and James Fisicaro, of San Francisco, motored to Niles last Saturday to visit their sister, Mrs. R. Brunelli, who was Miss Lillian Varni of Colma. Mr. and Mrs. Brunelli are the proud parents of a lovely baby girl, born recently.

Preparations are being made for the exhibit for the schools of the Jefferson district, which will be held at the Jefferson Union high school on May 21. The First to Fourth grades will preesnt a program in the afternoon, while the higher grades and the high school pupils will present the evening's program. Miss Torello is chairman of the exhibit and entertainment; Miss Earle, general chairman of the grammar school exhibit, and Miss Traynor of grammar school entertainment.

A number of local girls have organized a social club to be known as La Fiesta Social Club. The features of this organization will be dancing, swimming, hiking, ice skating and dramatics. Meetings will be held twice a month at the homes of the members. The plans were made at a meeting held recently at the home of Sylvia Fischer, and last Friday evening when the members were entertained by Lorraine Wall, Margie and Tessie O'Connor the following officers were elected: Lorraine Wall, president; Elsie Fahey, vice-president; Margie O' Connor, secretary; Sylvia Fischer, treasurer; Thelma Selmi, chairman of swimming committee, and Laura Figone, chairman of the hiking committee. Many girls have long felt the need for a club of this sort, and the full quota have already signed up. Following are the names of the members: Caroline Spani, Thelam Selmi, Louise Segale, Ruby O'Connor, Sarah Battaini, Annette Lucey, Margie O'Connor, Grace Johnston, Sylvia Fischer, Tessie O'Connor, Margaret Varni, Lorraine Wall, Collista Dalton, Julia Sampson, Louise Gregory, Laura Figone, Edna Stewart, Elsie Fahey, Esther Forsell, Florence McKendrick, Freda Christen and Christine Michelson.

HIGH PAY OF WORKERS DUE TO ELECTRICAL HELPERS

As wage levels rise with the increase of mechanical power the American worker owes much to the developement of the electrical power industry.

Owen D. Young, leader in this developement, also one of the authors and administrators of the Dawes method of putting Europe back on its feet, recently discussed the relation of power and wages. His speech attracted the attention of the New York Sun, which said editorially:

"He shows that one of the requirements of a high wage level is to put more power back of the individual worker. We must use human beings more and more to direct power rather than to generate it. The wage curves of the principal countries in the world he contends, follow closely their power development curves. He illustrates his point forcefully by comparing such extremes as China and United States. In China man power is still used for transportation and many other purposes and wages are pitifully low; here our labor is backed up by a larger amount of power than in any other country and the wage level is the higest in the world."

HISTORIC SETTLEMENT TO GET "LONG DISTANCE"

Where once the smoke signals of the aborigines passed messages from peak to crag, the humming copper strands threading the canyons and vales now bring distant points closer together and make easy of access the ancient, mystic and romantic settlement of Toas, New Mexico, in the southern Rockies.

In Taos the prehistoric past is strangely associated with the unromantic but efficent present. First seen by white men in 1541, when Coronado was searching the land for the seven mythical cities of fabulous wealth, a telephone office has now been established in this historic village and is being equipped with modern long distance apparatus which will put it in direct communication with the rest of the country.

If Cuba's sugar output for a year were dumped in one pile it would be twice as large as the great Cheops pyramid of Egypt.

Amp's Advice to Autoists

"DON'T let your battery get the 'shakes'. That's what happens when hold-downs aren't kept tight. Battery bumps about in its compartment, active material is shaken out of plates, life is shortened. We look for and tighten loose hold-downs —save you money!"
—Little Ampere

WESTERN THRILLER COMES TO NEW STATE

The constant conflict between the ever-menacing cattle smugglers and the law-abiding ranchmen of the Arizona-Mexican border is vividly picturized in Harold Bell Wright's romantic novel, "A Son of His Father," a Victor Fleming-Paramount production which will be shown next Sunday at the New State Theatre.

The setting of the picture is the fascinating one of the changing West as it noticeably shifts in the little lapse of time between a son and his father. The production was filmed nearly one hundred miles from the nearest house, in the vast cattle country of southern Arizona—the actual locale of the story as Mr. Wright wrote it.

The public, which is turning away from the gaudy flapper to the age-old ideal of wholesome American manhood and womanhood, will find honest enjoyment and real refreshment in "A Son of His Father." It is the most vigorous, the most stirring and the most appealing of the famous line of novels which have made Harold Bell Wright pre-eminent.

A great author, a great cast, a great story, plus action, heart-interest, melodrama, thrills and love interest go to make "A Son of His Father" a picture worth playing up, heart and soul, hammer and tongs.

OUTLOOK PROMISING FOR CONTINUED FEDERAL AID

Efforts of the motorists of the nation to secure continued appropriations from congress for federal aid in highway construction are meeting with encouraging success, the California State Automobile Association announced following an analysis of the present congressional attitude on the matter.

While some effort to reduce authorizations for 1928 and 1929 will unquestionably be made on the floor of the House, the majority sentiment in congress seems to be to continue the government's participation at no lesser rate than $75,000,000 per year, according to the Automobile Association, which is leading the campaign in the West to insure continued federal support for the national good roads program.

Authorizations for 1926 and 1927 were made by the last congress, and an appropriation for 1927 of $80,000,000 will be carried in this year's agricultural appropriation bill. There is little likelihood of opposition to this appropriation, which represents an absolute obligation of the government which can not be avoided without breaking faith with the states.

However, in the matter of authorizations for 1928 and 1929, it is expected that considerable educational work may still be necessary before the bill introduced by Congressman Dowell of Iowa, chairman of the House committee on roads, is approved by both houess of congress.

This bill authorizes apropriations of federal aid funds to the amount of $80,000,000 for each of the fiscal years 1928 and 1929, and also carries an additional authorization of $8,000,000 for each of these two years to be used on forest roads and trails.

The Houes has referred this bill to its committee on roads for consideration, and hearings will be held early in February, according to an announcement made by H. J. Brunnier, chairman of the good roads committee of the State Automobile Association.

With eight new members out of a total of twenty-one on this committee, it may be necessary to carry on a campaign of education for their benefit, Brunnier said. Opposition may come from Massachusetts, New York and Pennsylvania, which are represented on this committee, but it is believed that the majority of the members, having the best interests of their constituents at heart, will vote for continued appropriations.

If the federal aid bill is approved on the floor of the House, it will go to the Senate and be referred to the Senate committee on post offices and post roads. With the exception of four Senators serving their first terms and two others, all of the sixteen members of this committee are on record as having voted for continued federal aid when the bill authorizing appropriations for 1926 and 1927 was enacted into law. It is believed, therefore, that this committee will report the bill to the Senate with a favorable recommendation.

NOTICE OF THE FILING OF STREET ASSESSMENT AND OF TIME AND PLACE OF HEARING.

NOTICE IS HEREBY GIVEN by the undersigned, City Clerk of the City of Daly City, County of San Mateo, State of California, that the Superintendent of Streets of said City heretofore and on to-wit: the 18th day of March, 1926, filed in the office of and with the undersigned Clerk a certain assessment and diagram to cover the sum due and incidental expenses for the work and improvement done and made by Eaton and Smith in said City under and in pursuance of its contract therefor with said Superintendent of Streets, which work and improvement is that particularly described in that certain Resolution of Intention No. 31, passed and adopted by the Board of Trustees of said City, July 13, 1925, to which reference is made for description thereof and description of the district to be assessed and said assessment being made and filed pursuant to the provisions of the "Improvement Act of 1911," and the said Resolution of Intention:

Said assessment shows the amount to be paid pursuant to said contract for the work contracted for and performed, together with all incidental expenses, the district to be assessed for said work, the amount of the area of each lot or parcel of land assessed, and the amount of each assessment against each lot or parcel of land assessed, and has attached thereto a diagram exhibiting the district of land assessed, and each street and street crossing lane, alley, place or court, property or rights of way, on which any work has been done, and shows the relative location of each lot or portion of lot, to the work done, numbered to correspond with the numbers of the assessment.

NOTICE IS HEREBY FURTHER GIVEN that Tuesday, the 13th day of April, 1926, at the hour of 8 o'clock P. M. of said day and the Council Chamber of the Board of Trustees of said City, in the City Hall of said City, is the time and place fixed by the undersigned Clerk for the hearing of said assessment and all protests against and appeals from the same, when and where all persons interested in said assessment, the property assessed or work done, may appear and be heard in regard thereto.

The owners, the contractor, or his assigns, and all other persons interested in said work or in the assessment, feeling aggrieved by any act or determination of the Sueprintendent of Streets or City Engineer in relation thereto, or who claim that the work has not been performed according to the contract in a good and substantial manner, or who claim that any portion of the work for any reason was omitted or illegally included in the contract for the same, or having or making any objection to the correctness of the assessment or diagram or other act, determination or proceedings of the Superintendent of Streets, or City Engineer, shall prior to the day herein fixed for said hearing appeal to the Board of Trustees of said City by briefly stating in writing the grounds of appeal.

NOTICE IS HEREBY GIVEN that serial bonds to represent unpaid assessments, and bear interest at the rate of seven per cent per annum, will be issued hereunder in the manner provided by the improvement bond act of 1915, the last installment of which bonds shall mature nine years from the second day of July next succeeding ten months from their date.

Dated: March 18th, 1926.

B. C. ROSS,
City Clerk of the City of Daly City.

Crystal Set Circuit. Adjustment of Detector Is Fixed by the Manufacturers and Remains Permanent.

By WILMER S. TRINKLE

In Philadelphia Public Ledger.

One of the greatest drawbacks in the average crystal receiver is the lack of selectivity. To separate successfuly broadcasting stations when several local stations are on the air is an absolute necessity if good uniform reception is to be obtained.

The set here described is one designed to meet the above requirements. The selectivity is quite good and testing this set in the heart of the city the writer was able easily to separate the Philadelphia stations and also to receive programs from WJZ, when that station was broadcasting through 2XAR, its 50-kilowatt station at Bound Brook.

The detector circuit here shown will be familiar to the old operators who regarded it as one of the most reliable in a fixed type and is shown in the circuit diagram. It may be used in the usual type of circuit, which does not require a battery, but detector sensitivity is materially increased by the use of an applied voltage that can be regulated to a fine degree. This is regulated in the set here described by a potentiometer.

The adjustment of this detector is fixed by the manufacturers and remains permanent. The crystal here used is of the carborundum type and the contact pressure is quite heavy.

The Parts Needed.

The parts used to construct the set here described are as followes:

One fixed carborundum detector.
One aero-coil coupler.
One variable condenser .00035 mfd. capacity.
One fixed condenser, .001 mfd. capacity.
One potentiometer, 200 ohms.
One single-circuit jack.
Four engraved binding posts marked as follow:

Ant., Gnd., A—, A+,

One panel, 7 by 10 inches.
One wooden sub-base, 7 by 8 inches.
One 4-inch dial.
Two lengths of No. 14 bus wire.
One dry-cell, one and a half volts.

The coupler used is of the single-layer solenoid type of the air-core variety and consists of two windings. The outside coil is the secondary, is three inches in diameter and consists of 61 turns of No. 22 double cotton-covered wire. The primary is wound inside of the secondary and near one end. It consists of seven turns of the same size wire as the secondary and is space-wound. This coupler covers the broadcast wave-length band when tuned with a .00035 condenser.

The condenser used is of the new straight-line frequency type and has a maximum capacity of .00035 mfd. It is quite compact and requires but little more room than the old-fashioned, straight-line capacity type. The use of this condenser in conjunction with the specified coil gives uniform frequency spacing on tuning dial.

The crystal detector used is a fixed carborundum and is completely sealed in. The user does not need to make any adjustments at all. One terminal is marked A and the other G. These figures are indicated in the circuit diagram, and the detector hooked up in that fashion. However, try the detector both in the position shown and also reversed to ascertain which way it works the better in your own particular set. The voltage of the battery used in this particular detector circuit is varied by the use of the potentiometer so that the best operating point may be found.

Laying Out the Panel.

The laying out of the panel is quite simple, and the drilling is cut down to a minimum. Starting from the left of the panel, measure in three inches and up three and one-half inches to locate the center of the condenser.

The potentiometer is mounted two and one-half inches in from the right hand edge of the panel and is on a line with the center of the condenser. The phone jack is mounted four and one-quarter inches in from the right-hand edge and one inch and a half up from the bottom. By studying carefully the rear view of this receiver, the other instruments can very readily be mounted in their respective positions.

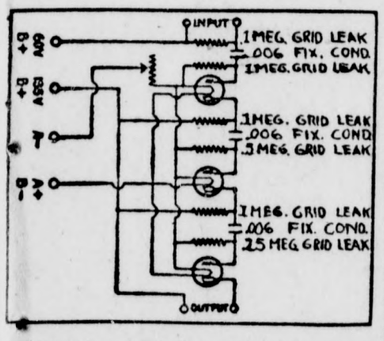
Wiring the set may then be begun, and by carefully following the circuit diagram, no trouble should be experienced.

After the entire set has been assembled and wired, the antenna and ground should be connected to their respective posts, and a one and one-half-volt dry cell connected to the A posts. By manipulating the tuning dial and potentiometer adjustment, it should now be possible to tune in broadcasts. It is then time to try reversing the polarity of the dry cell and also of the crystal detector. After the best combination is found, do not change it.

Best Amplifier for Reducing Distortion

No doubt there are a number who have one-tube sets with which they would be quite satisfied if they gave more volume. Adding amplification will accomplish this object.

The resistance coupled amplifier is one of the best amplifiers for distortionless reception. It is a very easy amplifier to build, costs less than any other form of amplifier, takes up little



Resistance Coupled Amplifier Best for Distortionless Reception.

room, and compared with other amplifiers, draws less current from the "B" batteries.

On the other hand, it has some disadvantages. It requires three tubes to give about the same results as are secured with two tubes in a transformer coupled amplifier. Another disadvantage of this amplifier is that it takes more "B" battery voltage, up to 135 volts, as against 90 volts required for other types.

As you can see by the circuit diagram shown, it consists principally of a series of resistances. The condensers used vary from .006 to .05. The best capacity will be found only by experiment. However, in most cases .006 is correct. If you are using dry cell tubes, you will have to vary the resistors which make up the secondary un-

Slow Charge Is Best for Your Radio Battery

Storage batteries are charged by sending a direct electric current through them in the opposite direction to the current flow on discharge.

For the usual six-volt battery, the charging current ordinarily used will be from two to five amperes.

In order to obtain such a rate of current flow various types of battery chargers are used.

These convert the source of supply to which they are connected into direct current, if the source is alternating current, and reduce the voltage to the proper value for charging the battery at the current rate it requires.

Cells should not be overcharged, because of the danger of buckling the plates, due to surface expansion.

If the plates become sufficiently buckled, internal short circuit may be caused, resulting in bad sulphation. Overcharge, however, is not nearly so liable to damage the battery as overdischarge.

How to Tell Values of Different Grid Leaks

A suitable set of values for a grid leak would be one megohm, two megohms, three megohms, five megohms and seven megohms. A means may be provided for bringing these values in action which may be secured by wiring a tap switch so that it may be used to switch any one of a number of grid leaks into the circuit. This will provide a definite, positive value of grid resistance to suit the requirements of various groups of stations, according to their distance and power.

How Condenser Operates

The fixed condenser in the grid circuit of a resistance coupled audio-amplifier is an important part of the apparatus, as it allows the radio frequency current on the plate of the previous tube to reach the grid of

CALIFORNIA NEWS BRIEFS

With complete outfits of new clothing including overcoats supplied by the Salvation Army, fourteen Japanese sailors returned to Japan on March 11, on the S. S. Java Arrow, which picked them up January 18 from the drifting Daishin Maru No. 3. Without water for three days and with no food for fifteen days but rats caught by the ship's cat, the sailors were temporarily blind and had to be carried from their helpless ship when rescued. Upon arrival in San Francisco, they were met by Captain Kobayashi of the Japanese Division of the Salvation Army, cared for, reclothed, given a sight seeing trip through the city a luncheon at a hotel, warm overcoats for the home voyage and $2.00 each for personal needs. Upon their return to Japan the sailors will be aided by the Japanese government.

Ernest E. Williams of San Jose and Richard M. Lyman, Jr., of Oakland were appointed recently as assistants to United States Attorney George J. Hatfield. They take the places made vacant by the resignation of Thomas J. Riordan and George F. Snyder. Mr. Williams is a graduate of Stanford University where he obtained degrees of A. B. in 1917 and J. B. in 1920. He will handle prohibition cases for the government. Richard M. Lyman, Jr., graduated from the University of California, receiving degrees in 1915 and 1917. He was assemblyman from Alameda county in 1923. He has been assigned to customs work.

The State Department of Agriculture employs one of the few women sealers of weights and measures in the United States. Mrs. May E. Johnston has been sealer of weights and measures in Humboldt county for twelve years. She recently completed a survey of the county creameries and tested the weights of over 4,000 cartons of butter and all creamery scales. A few years ago a woman qualified as deputy horticultural commissioner in Fresno county, and another was a squirrel inspector in Kings county.

A prominent San Francisco real estate man announced recently he would open a fish restaurant in San Francisco soon in which each patron will be required to "catch his own." He explained that the restaurant would be fitted with large glass tanks bountifully stocked with fish, and that as the would-be diners land their finny entrees, the cook will take them off the hook and rush them to the frying pan or broilers, to be served to the lucky anglers when desired.

Capacity of the Pacific Packing company plant at Oakdale, Stanislaus county, is to be increased 50 per cent by the addition of one complete unit. Not only is the company to increase its capacity but it is to greatly broaden its activities to handle new fruits. A new building, 32x140 feet will be built and equipped with the most modern machinery in the way of syrupers, pitters, slicers, packing tables and everything that goes to make up a modern cannery.

What is believed by William Anwyl Jones of Fairoaks, Sacramento county to be a flock of wild or passenger pigeons making a home in his eucalyptus grove not far from his home. The flock has twenty-five or thirty birds in its make up and corresponds to the general description of the wild or passenger pigeon so numerous thirty or forty years ago, when from the Gulf to the extreme northern latitudes they were very common, but suddenly disappeared.

An American flag which is said to be the first ever raised in California has been offered to the state as an historical relic by Bert H. Stambaugh. Stambaugh says the flag is thought to have been brought around the Horn by members of a little known expedition which sailed from the Atlantic coast shortly after the Revolutionary war.

More than half the voters in Placer county have already registered. County Clerk A. S. Fleming, of Auburn says the total is 4,909 to date. Republicans have a big lead in the county with 3,190 claiming membership. There are 1,425 Democrats; sixty Socialists; fifty-four Prohibitionists and 180 persons who decline to state.

A committee of fifty citizens of Flournoy, Paskenta and Corning, Tehama county met at Flournoy and plans were made for leasing some 20,000 acres of land to an oil company of southern California, for a period of ten years, the work of development to be commenced within two years from now.

An official protest has been lodged with the Waterford, Stanislaus county, chamber of commerce against gold dredging in the Tuolumne river. Silt is being constantly thrown up and will cause water plants and weeds to grow, making the river a marsh and bog instead of a clear river.

Contractors who have the contract to construct the tunnels for the Bucks Ranch power project of the Feater River Power company near Oroville, Butte county are rushing work of camp establishment in the Grizzly Creek district. Snow is now nine feet deep at Letterl...

Anthony Milne of Scott Bar, Siskiyou county, is the oldest man in Siskiyou. He reached the rare old age of 94 years on March 16. Be temperate; be happy; be diligent; be an early riser and as easy to bed and

John Studebaker and J. A. Gyger, will soon open a broom factory in Healdsburg, Sonoma county.

Davis, Yolo county, business men held the first meeting for the purpose of organizing the Davis rotary club.

The Graton community club of Sebastopol, Sonoma county has set the date for the annual wildflower show April 7.

The state highway commission met in San Francisco March 17, to consider road reconstruction in the San Joaquin valley.

Mrs. Mary Williams, Weaverville, one of the oldest pioneer residents of Trinity county, is dead at the home of her daughter, at the age of 88.

Champions of labor, 300 delegates to the State Building Trades Council of California, met in Marysville, Yuba county, for the twenty-sixth annual convention.

Mrs. Rebecca Jane Ivory, one of the few remaining pioneers, of Lodi, San Joaquin county, who crossed the plains with an ox team in 1854, died at the age of 80.

The Rose Carnival committee of Santa Rosa, have arranged further details for the festival in May, which it is promised will astonish everybody by its beauty of detail.

Plans are already being discussed for the annual run of the Oakdale, Stanislaus county, chamber of commerce to Yosemite valley, to mark the opening of the Big Oak Flat road.

Harold McFarland of Redwood valley, Mendocino county, caught an eagle with an 11-foot wing spread, in a trap. The big bird had been preying on lambs on the sheep ranges.

Plans for a flower and fern festival to be held May 1 and 2, at Auburn, Placer county, are being discussed by the Woman's Auxiliary of the Richard W. Townsend Post of the American Legion.

With a view to securing a community clubhouse at Coloma, Eldorado county, the Coloma-Lotus farm center, appointed three committees to investigate the project and to report at an early meeting.

After a search over a large part of the Pacific coast, Placerville, Eldorado county, has been selected as the site for the new experiment station to be established by the Eddy Tree Breeding institute.

During the two years that Adjutant General R. E. Mittelstaedt has been in command of the California National Guard, the total number of officers and men in this service has increased from 3,493 to 5,238.

The house bill authorizing the government to sell some lots to the city of Stockton, at $1.25 an acre for the purpose of flood control was ordered favorably reported by the senate public lands committee.

Voters of the Newcastle grammar school district, Placer county, will vote on March 26 on the question of voting $20,000 in bonds for an addition to the school building. The present building has been outgrown.

That the Afghan Welfare association, with headquarters in Sacramento will attempt to seek recognition from the federal government of a standing befitting their race was the statement made in Oroville, Butte county, recently.

At a saving of $515, vocational students in the woodworking department of the Stockton high school at Stockton are making 24 desks for the use of teachers. Cost of the desks retail would range from $35 to $40 each. They cost the school $13.50 apiece.

The citizens of Citrus Heights, in Sacramento county, turned out recently to repair the roads in this district. It is an annual affair and besides supplying their labor the people furnish tractors, horses, scrapers and other equipment.

Three machines are now digging the upper end of the main canal that is to bring Sacramento river water by way of Haas slough for irrigation of District 2068, comprising 13,600 acres of land lying to the southeast of Dixon, Solano county.

Cantaloupe planting will be under way in the near future in Stanislaus county by reason of favorable weather conditions. The acreage will probably be somewhat less than last year. The small growers will plant as usual but the large growers will go lightly on this crop. It is estimated that between 2,500 and 3,000 acres will be planted to cantaloupes this season.

With the West Coast Theaters Corporation preparing to build a new theater and office building in Marysvills, Yuba county, at a cost of approximately $400,000, it is announced that a second theater is to be erected. The Golden State Theater Corporation of California has announced that a quarter million dollar playhouse will be erected.

Announcement is made in Marysville Yuba county, by the Pacific Telephone and Telegraph company that $250,000 will be spent in extensions and improvements in the territory between Nicolaus and Chico, with Marysville as the working center. This sum is in addition to $50,000 now being spent in the city limits of Marysville on improvements.

The so-called mountain counties' water conservation bill which was introduced before the 1925 legislature by Assemblyman H. E. Dillinger of Placerville and which Governor Richardson pocket vetoed, is coming up again at the 1927 session with stronger support behind it than ever. Such is the gist of reports from El Dorado county where sentiment appears to be outstanding strong for the measure and the county board of supervisors has passed a formal resolution calling

The AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

VETERANS AIDED BY REED-JOHNSON LAW

Additional benefits of $28,811,113 have been received by some 55,000 disabled World war veterans under the operation of the Reed-Johnson bill, which was passed in June, 1924, under the sponsorship of the American Legion.

Approximately 30,000 of the 55,000 benefiting by the liberalizing provisions of the law had never before received compensation from the government in any form, according to information received from the United States veterans' bureau by Legion rehabilitation officials in Washington.

Twelve thousand veterans suffering from tuberculosis were awarded $13,000,000 in compensation. Mentally incompetent veterans got $7,500,000 in added benefits under the new law. Dependents of disabled veterans to the number of 4,336 received additional allowances totaling $300,497, and 12,344 dependents of deceased veterans received increased allowances amounting to $1,154,280. Veterans received in allowances for nurses and attendants $525,800. Nearly $1,000,000 in compensation was awarded to 800 veterans in the so-called "wilful misconduct" cases.

Nearly 10,000 veterans have obtained hospital treatment under the general hospitalization provision of the Reed-Johnson bill. This provides that veterans may get treatment regardless of the nature or origin of their ailment.

Hundreds of thousand of cases which had been lying untouched in the veterans' bureau, because inadequacies in the law prior to the passage of the Reed-Johnson bill, made it impossible to take favorable action upon them, are now being reviewed by the veterans' bureau. This review, which was suggested by Legion officials, is now well advanced.

Additional extensions and clarifications of the laws affecting the disabled were sought from congress at its session beginning in December, 1925. "When these extensions and clarifications are made," Watson B. Miller, chairman of the Legion's national rehabilitation committee, declared, "the most remarkable milestone in the progress of the United States towards the rehabilitation of its war disabled will have been accomplished."

Cut Out Red Tape in Reinstating Insurance

The department of Minnesota of the American Legion has recently announced a plan that will cut much of the red tape that tends to prevent veterans from reinstating their insurance, according to recent announcement at department headquarters at St. Paul.

The Legion has proposed that the posts hold a series of special insurance meetings with two government representatives, a physician and an insurance executive present to examine the applicants and take definite action on their individual cases. This, the Legion pointed out, would eliminate virtually all red tape, which became so distasteful to the former fighters that many of them are willing to sacrifice their federal insurance to avoid further entanglements.

The plan will be tried out in Minnesota and if the response warrants it national Legion officials will be approached with a view to extending the movement to all states, said Edwin L. Lindell, department adjutant.

War Risk Policies for New Jersey Policemen

When Joseph F. Deegan, service officer of the American Legion connected with the veterans' bureau office at Newark, N. J., heard that four policemen in Raritan township had been refused insurance by old-line companies because of the "hazardous nature" of their occupation he took steps by which the men are now adequately insured by the government. Deegan found that the policemen were all ex-service men, and hence could reinstate their war risk insurance policies. The township of Raritan took out the policies for the men under a blanket policy.

Supply and Demand

Two cracker-box philosophers at Bangs Corners were lamenting the times.

"There's laws bein' busted every day in the week," moaned the first. "Somethin's gotta be done about it."

"Wal," conforted the second. "I reckon we're makin' new ones as fast as the old ones is bein' broke."—The American Legion Weekly.

Professional Pride

"Someone was telling me," remarked Mrs. Jones to her new cook, "that your husband is a close follower of the papers."

"Indeed he is, mum," replied the cook. "Why, they say he's the best man the department's got for keepin'

VALUE OF GOOD WILL

One of the striking developements of recent years in the business world is the increased value which individuals and corporations place upon the good will of the public they serve.

Good will is really only another name for confidence, for if a business concern has the confidence of the community, it has its good will. It often takes years of fair dealing to build up the great asset of public confidence, yet it may be lost by a few shady transactions.

For this reason, everlasting vigilance is required on the part of owners of a business, to see that not only are their own principles and policies sound, but that the spirit of the establishment is carried out by every person connected with it, even to the lowest salaried employe.

Keen business men of today realize this fact as never before, hence they are exercising greater care in the selection and training of their subordinates, treating those found faithful with greater consideration, and frequently encouraging them to become partners or in some manner permitting them to share in the profits of the concern.

GOING SOME

The first car to cross the continent over the Lincoln highway, twenty-two years ago, spent forty heartbreaking days on the road. Last year, one driver covered the route from New York to San Francisco in 102 hours, 45 minutes—only a few hours longer than the transcontinental train time, with its many changes of drivers.

America's leadership in oil production and refining, automobile manufacturing, and road building are the three factors which made such a feat possible.

Cheap gasoline and automobiles enable the American people to "move on wheels."

Martin Sheets, of Terre Haute, Ind., had a telephone installed in his mausoleum before his death, and so far hasn't made a single complaint about getting the wrong number.

TOO MUCH HOSPITALITY

That all the comic and tragic possibilities of prohibition are probably not exhausted is illustrated by an incident recorded in press dispatches which might form the nucleus of a great movie scenario.

Brigadier General Smedley Butler of the marine corps, who tried for several months to clean up Philadelphia, was relieved from that unfinished business and ordered to military duty at San Diego, this state. To welcome the general with due hospitality, Colonel Alexander Williams, his predecessor, gave him a big banquet at the Coronado Hotel, where it is said real cocktails were served.

Later in the evening, according to General Butler, Colonel Williams became intoxicated, whereupon his superior officer and guest had him arrested, and General Butler has preferred charges against his former host for drunkenness. The Colonel will probably face court martial for his offense.

While General Butler probably did his duty, it does seem a shabby way to treat one's host.

WHAT THEY SPEND

An enlightening lot of carefully compiled figures concerning the percentages of gross receipts spent for advertising by a number of firms doing a nation-wide business has recently been published in Ramsey's 'Constructive Advertising."

Sears, Roebuck & Co. spend 10 per cent of their gross for advertising. Welch's Grape Juice, Old Dutch Cleanser, and Marvis also spend 10 per cent; Evinrude Motors, 8 per cent; McCray Refrigerators and Champion Spark Plugs, 7 per cent; Velvet Tobacco, 6 per cent; Betty Wales Dresses, Fatima Cigaretes, Markham Air Rifles and Phonographs, 5 per cent.

These are only a few of the concerns whose advertising appropriations run into enormous sums, and everyone knows that they do an ever increasing volume of business year after year.

Yet in spite of such overwhelming proof of the efficacy of intelligent publicity, many local merchants still deceive themselves with the idea that they "can't afford to advertise."

PLATOON PLAN SCHOOLS

Among the plans devised for relieving congestion in school buildings of the country, the platoon system gives promise of solving this important problem, at least to a great extent.

Briefly, the plan is to divide the pupils into groups, or platoons, whereby one section pursues purely book studies and recitations while the other section is engaged in special activities and play.

It is claimed that this system secures better results through maintaining a more lively interest on the part of the pupils, affording more specialized teachers and a fuller use of the school plant, thus permitting a larger enrolment.

In a bulletin issued by the board of education of Birmingham, Alabama, it is declared that in eighteen public schools of the city nearly 2,000 more pupils are being accommodated under the platoon system than could be taken care of under the old plan of elementary instruction.

Progressive educators everywhere are earnestly attempting to solve many pressing school problems, and from the success which has attended the platoon system in about 100 cities where it has been tired, it appears that it is developing into an important agency for overcoming one phase of our educational difficulties.

RAPID GROWTH OF FARM RADIO

There are nearly one million radio sets on farms in the United States, the Department of Agriculture estimates in a report on the growth of farm radio during the past five years.

In some states, the report says, there are raido sets on 25 to 40 per cent of all farms. Estimates made by the department in 1923 showed 145,000 sets in use on farms at that time; 365,000 sets in 1924, and 553,000 sets early in 1925.

Increased power and improved broadcasting, together with better receiving sets, the department believes, "will do much to aid in establishing permanency of use of radio for the benefit of agriculture."

"One station alone in a period of three months broadcasting of market and weather reports, received more than 3,000 letters of commendation from farmers, country banks, shippers of live stock, and small merchants

FATAL CARELESSNESS

It is one of the most amazing facts connected with modern life that the appalling number of deaths resulting from carelessness makes no greater impression upon the general public.

In spite of the daily record of grade crossing accidents, drivers continue to take a chance, with the inevitable percentage of fatal results. The same is true of other practices which take their grim toll of human life.

Persons who are ordinarily careful in protecting their property or their health appear to throw discretion to the winds the moment they grasp the wheel of an automobile, and positively invite disaster through failing to observe the most elementary cautions.

The jaywalker is equally reckless, taking the chance of being run down for the sake of saving a few steps or a moment's time. Those who are careless of other dangers help to swell the harvest of death.

And the most lamentable fact is that no amount of warning appears to have any appreciable effect.

IS JOB PRINTING A GOVERNMENTAL FUNCTION?

The small newspaper publisher with his job printing office has been harder hit by government competition in the printing industry than have the operators of any other line of business. The little printer is in direct competition with the great tax-free government printing office with its tremendous buying power backed by the credit of the United States treasury itself.

The National Editorial Association is at the present time leading in the campaign to get the government out of the commercial printing business. If it can print and sell envelopes, why not print and sell the letterhead paper to go with the envelopes; or sell letter paper unprinted if the customer so desires? If the quantity buying power of the government is to be used for the benefit of the purchaser of one commodity, why not extend it to all commodities?

The principle involved in this fight is whether or not it is a legitimate function of government, local, state or national, to go into competition with private citizens who must furnish the taxes and the brains to maintain government itself. The National Editorial Association is doing a public service in bringing this question to a head.

The New York judge who declared that a man is master of his own home reflects little credit upon the wisdom of the judiciary.

Three former immigrants want to place a wrist watch on the Statue of Liberty. What the old girl really needs is an alarm clock.

NOTICE OF TRUSTEES' SALE UNDER DEED OF TRUST.

WHEREAS, CHARLES GUST AND ANASTASSIA GUST, his wife, did heretofore make, execute and deliver a certain deed of trust, bearing date the thirty-first day of October, 1924, conveying to GEO. M. MITCHELL and JOHN HENDERSON, as trustees, certain real property, hereinafter and in said deed of trust particularly described, for the benefit of and to secure the payment to HOME MUTUAL DEPOSIT-LOAN COMPANY, a corporation, of the principal and interest of a certain promissory note or loan agreement, also bearing date of October 31, 1924, payable to said Home Mutual Deposit-Loan Company, which said deed of trust was recorded on the 5th day of November, 1924, in the office of the County Recorder of the County of San Mateo, State of California, in Volume 137 of Official Records, at page 385 thereof; and

Whereas, on the 16th day of December, 1925, said Home Mutual Deposit-Loan Company recorded a notice of default and election to sell under said deed of trust, in Volume 209 of Official Records, at page 27, in the office of the County Recorder of the County of San Mateo, State of California; and

Whereas, said Home Mutual Deposit-Loan Company has made demand upon the undersigned, Geo. M. Mitchell and John Henderson, under the power and authority conferred upon them as trustees under said deed of trust, to sell the real property therein and hereinafter particularly described, to satisfy said indebtedness;

Now, therefore, in accordance with the terms and conditions and under the authority of said deed of trust, and in pursuance of a resolution passed and adopted on the 8th day of December, 1925, by the Board of Directors of said Home Mutual Deposit-Loan Company, the owner and holder of the promissory note or loan agreement hereinbefore referred to, declaring that default in the payment of principal and interest on said promissory note or loan agreement has been made and requesting and directing said Geo. M. Mitchell and John Henderson, as trustees under the power and authority conferred upon them by said deed of trust, and in pursuance of said resolution, to sell said real property described in said deed of trust and hereinafter particularly described, to satisfy said indebtedness, the undersigned, Geo. M. Mitchell and John Henderson, do hereby give notice that, on TUESDAY, the 13th day of April, 1926, at the hour of ten o'clock a. m. of said day, at the office of Home Mutual Deposit-Loan Company, No. 282 Bush street, in the City and County of San Francisco, State of California, they will sell at public auction to the highest bidder, for cash in gold coin of the United States, all that certain real property, with improvements thereon, situate, lying and being in the Town of Daly City, County of San Mateo, State of California, and described as follows:

Lot Numbered Five (5), in Block Lettered "T," as shown on that certain map entitled "Map showing subdivision of the property of the Mission Street Land Co., situated in San Francisco and San Mateo Cos., Cal.," filed in the office of the County Recorder of San Mateo County July 31, 1895, in Book "E" or Original Maps, at page 73, and copied into Book 2 of Maps, at page 73.

Terms of Sale: Cash, ten (10) per cent payable to the undersigned at the fall of the hammer, balance upon delivery of deed, and if not so paid, unless for want of title, ten (10) days being allowed for search, the said ten (10) per cent to be forfeited and the sale to be void.

Dated, San Francisco, California, March 18, 1926.

GEO. M. MITCHELL, Trustee.
JOHN HENDERSON, Trustee.
MILO R. ROBBINS, Attorney for Trustees, 526 Mills Building, San Francisco, California.

OPINIONS SHOULD DIFFER

It is characteristic of most persons who have decided opinions on any subject that they should try to bring everyone else to their way of thinking.

In cases where the issue is a clear-cut one, involving right and wrong, it may be that an uncompromising attitude is justified. But who shall say just what is right and what is wrong? Ideas concerning right and wrong change with the times.

Not so many years ago some of the most culture and enlightened people of this country believed that human slavery was legitimate and proper. George Washington was one of them; at least he was a large slave-owner as long as he lived. We think it wrong today.

The Puritans thought it wrong for a man to kiss his wife on Sunday, and they passed a law prohibiting him for doing so. We think it all right today.

If everyone had agreed with such old ideas and no one had ever mustered up the courage to combat them, we should have made little progress. We would still be burning witches.

What is needed in the world is not that we should all think alike, but that we should have a greater feeling of tolerance and respect for the opinions of others, when honestly held, no matter how much they may differ from our own.

The average normal person is really seeking for the truth—but the truth is often elusive, and each must find it out in his own way.

CANDLE, ALASKA, BOASTS NORTHERNMOST EXCHANGE

The farthest telephone north in the territory belonging to the United States is way up in Alaska, some 100 miles above Kotzebue Sound on the Kobuk river. It belongs to the farthest north telephone exchange at Candle, Alaska, which connects with Nome, Deering, Haysock and Keewalik.

Owing to the severity of the Arctic winters, the Kobuk river is closed from October 1 to June 1, and communication except by dog team is possible only by telephone. During the summer months a boat on the river makes regular trips, but without the telephone this section would have little contact with the outside

NOTICE

Of General Municipal Election of Daly City on April 12, 1926.

NOTICE IS HEREBY GIVEN that a general municipal election in and for the City of Daly City will be held on Monday, the 12th day of April, 1926, at which election the following offices shall be filled:

Three (3) members of the Board of Trustees.

For the purpose of said election in said City, the said City of Daly City shall be, and is hereby, divided into five (5) consolidated election precincts, to be known and described as "Daly City Municipal Election Precinct No. 1," "Daly City Municipal Election Precinct No. 2," "Daly City Municipal Election Precinct No. 3," "Daly City Municipal Election Precinct No. 4," "Daly City Municipal Election Precinct No. 5," which said five (5) election precincts shall severally contain such territory in the City of Daly City as provided herein.

For such general municipal election the Board of Trustees has appointed one (1) inspector, two (2) judges and two (2) clerks, to have charge of such election in and for each municipal election voting precinct.

In said Daly City Municipal Election Precincts the polls for said election shall be held at the places and the election conducted, as aforesaid, by the inspector, judges and clerks hereinafter named as follows, to-wit:

Consolidated Voting Precinct No. 1, comprising State and County Precincts Nos. 1, 2 and 3, and the polling place thereof shall be the Fire House of Daly City Fire Company No. 4, on Peoria Street, between Evergreen Avenue and Crocker Avenue, and the inspector shall be Edward Rider; the judges shall be Mrs. Mary Murphy and Mrs. Lily M. Brady; and the clerks shall be Mrs. Helena O'Connor and Mrs. Martha Wegner.

Consolidated Voting Precinct No. 2, comprising State and County Precincts Nos. 4 and 5, and the polling place thereof shall be at A. L. Hilton's place, situate at No. 162 Crocker Avenue, and the inspector shall be Mrs. Catherine H. Reinhart; the judges shall be Mrs. Alice C. Bergh and Mrs. Ella McKee; and the clerks shall be Mrs. Janet Y. Turner and Mrs. Jeannette Fischer.

Consolidated Voting Precinct No. 3, comprising State and County Precincts Nos. 6 and 7, and the polling place thereof shall be the Fire House of Fire Company No. 1, at 194 Santa Barbara Avenue, and the inspector shall be Mrs. Clara A. Poket; and the judges shall be Mrs. Anna Schenk and Mrs. Violet C. Hauptli; and the clerks shall be Mrs Janet C. Campbell and Mrs. Louise J. Crowley.

Consolidated Voting Precinct No. 4, comprising State and County Precincts Nos. 8 and 9, and the polling place thereof shall be the No. 199 Knowles Avenue, corner of Miriam Street, in said City of Daly City, and the inspector shall be Mrs. Mary A. White; and the judges shall be Mrs. Katherine Tromborg and Mrs. Mary Woodward; and the clerks shall be Mrs. Clara Gillet and Mrs. Augusta Devlin.

Consolidated Voting Precinct No. 5, comprising State and County Precincts Nos. 10 and 11, and the polling place thereof shall be the Fire House of Fire Company No. 3, West Lake Avenue near Mission Street, and the inspector shall be Mrs. Grace E. Colvin; and the judges shall be Mrs. Christine Squier and Mrs. Lucy C. Wickersham; and the clerks shall be Mrs. Clara Pfeifer and Mrs. Christine Michelsen.

At said election the polls shall be open at six (6) o'clock on the morning of the day of such election and shall be kept open until seven (7) o'clock P. M. on said day, when the polls shall be closed, subject nevertheless to the provisions of the laws of the State of California governing municipal elections which will be observed.

Dated: March 9, 1926.

INDIA TIRES

After a long and careful study of the merit and standing of more than a score of different makes of tires, we selected the India Tire as the one which would best satisfy our customers and friends.

No other single make of tire has such an enviable record of success. For appearance and positive endurance—two all important tire features—the India has never been surpassed and seldom equalled.

For these reasons we are ready and anxious to entrust our own reputation for fair dealing and honorable methods to the performance of India Tires.

Our stock is now complete. Come in and look over the various sizes. We don't ask you to buy—just come in and get acquainted with Indias.

We specialize on courteous and expert attention for women motorists.

SIDELIGHTS

By Marcy B. Darnall

Quite a lot of fun has been poked at a Tennessee editor who alluded to "Socrates drinking the fatal shamrock." Some of us remember an old-time brand called "Shamrock," which was not immediately fatal.

Prof. Einstein has been awarded a medal by the British Royal Society for his great work on relativity. The society should bestow similar recognition upon the first fellow who can demonstrate that he understands it.

An initial fund of $5,000 has been donated for research into the cause of baldness, which it is hoped will result in a scientific means of preventing the same. In the meantime we shall keep on buying hair restorer from bald-headed barbers.

Senator Blease declares that he would stand "without a bite, without a drink, and without a wink, and talk until March 4, 1931," if it would prevent the United States joining the World Court. Now, who says we have no dyed-in-the-wool patriots in congress?

In 1852, in discussing the possibilities of the telegraph, a congressman said in his speech: "The time will come when all the proceedings in congress will be transmitted, in extenso, to all parts of the Union daily." Unfortunately this dire prediction came true.

Fred Beauvais, former Indian guide of Mrs. Fifi Stillman, is suing her for $7,621.80, for "work done and money advanced." Those who had begun to fear that we should hear no more of this racy romance may be reassured.

The year 1925 was remarkably free from serious labor troubles, except in the coal fields, and a better feeling between capital and labor seems to be rapidly developing. Captains of industry are showing a growing appreciation of the corporals and the privates, and vice versa.

After discovering the South Pole and getting close to the North one without any serious results, Roald Amundsen caught a cold in Los Angeles and had to go to bed. Florida papers will probably make the most of it.

By a ruling of the Missouri prison board, bank wreckers and other socially prominent crooks will no longer be given soft clerical jobs in the penitentiary, but must do manual labor. It will be tough on them to have to associate with common folks like that.

Few will question the appropriateness of the award of a gold medal to William (Dad) Harris, aged 69, by the city of Cleveland. Dad's regular job is selling gasoline, but he shot and captured eight bandits in his spare time.

There may be extenuating circumstances for unseemly conduct, even for dancing the Charleston. When her landlady had Miss Dorothy Cope of Northwestern University arrested for "nearly shaking the house down," with her dancing, the young lady pleaded that there was no heat in her room, and that she had to do it to keep warm.

Seventy miles are saved in traversing the water route from New York to Boston by the Cape Cod canal.

CLOSE FIGURES FOR HIGHWAY

According to an artical published in the California Highways, a monthly publication issued by the State Highway Commission, the completion and acceptance of the Bayshore Highway in San Mateo county shows that the quantity estimates came within three per cent of the actual yardage moved.

The estimate for the construction of the 5.2 miles of embankment, 60 feet wide and approximately 5 feet in height, was 702,000 cubic yards, 162,000 cubic yards to be obtained by canal excavation and 540,000 to be secured from a borrow to pit and haul to the fill. Final quantities show 156,000 cubic yards of excavation and 520,000 cubic yards of borrow, or 22,900 yards less than the estimate.

Much study and thought was given this project. Valuable data were obtained from the Southern Pacific Railroad, which maintains fills across adjacent marsh lands where similar conditions prevail. Borings were also made along the line of the highway in connection with the studies of probable shrinkage and settlement. Fifty per cent was added to the preliminary estimate based on the survey of cross section quantities.

The fill cannot be opened to traffic until it has been thoroughly dried and a surfacing of rock has been placed.

WOMAN TAKING LEAF FROM HUSBAND'S BUSINESS BOOK

When a woman visits her husband's office she often may learn a valuable lesson in home economics.

On almost every desk there is a telephone. A desk telephone for the individual worker saves time, saves walking and promotes greater efficiency. The same business man, however, very likely has but one telephone in his home and the weary housewife has to climb the stairs or descend them several times a day to answer or make necessary calls.

The women, however, are learning from the men, and extension telephones are being added to American homes to a greater extent now than ever before.

A musical crank wants a law to compel everyone to sing, but it could hardly be enforced in bone-dry communities.

It may be, as a writer declares, that songs are not written about apartmnts, but some touching home balads are written in flats.

CARS TODAY ARE FAST AND SAFER

Highways Are Wide and Smooth Enough for Speed of 35 Miles.

The tendency of the automobile industry and of actual motoring conditions is for more speed with added safety.

Today highways are built wide enough and smooth enough to make safe speeds of 35 or more miles an hour. The current type of automobile, with four-wheel brakes and easy steering, is flexible and secure at such speeds.

Traffic regulations, on the other hand, are much the same as they were years ago when cars were not built to meet present-day demands. In most states they could be modernized to the benefit of everyone.

Slow Driver Worries.

By failing to keep up the speed limit on country highways, the slow driver causes a general paralysis of traffic, which works a hardship on other drivers, causes congestion and makes all driving much more dangerous.

The driver who loafs along at 15 miles an hour, slows up hundreds of cars which have the choice of lagging behind or of taking a chance by speeding around the slow one in the face of oncoming traffic. If the slow driver would speed up or turn off the road, the cars behind would soon be all well spread out and everyone would make better time.

Traffic has become heavy enough to warrant several changes in highway construction and in laws governing their use.

Penalize Slow Drivers.

A penalty on the slow driver who blocks traffic should help relieve this condition. Another should deal with the man who stops his car on the road to make adjustments or change tires, forcing traffic from both directions to shuttle its way through the open lane on one side. On wide highways, the man who drives slowly in the middle of the road should be subject to regulation.

It might be advisable to provide harbors at regular intervals along highways into which a motorist in trouble could drive his car to make adjustments, thus avoiding a traffic hindrance, which is a nuisance and a source of danger.

Improve Appearance of Tires by Use of Paint

Painting the tires with a coating of liquid rubber to which whitening has been added not only gives the shoes an attractive appearance, but it also helps preserve them. There are a number of tire-painting compounds to fill in small cuts and scratches as well as to add to the appearance of the shoes. In sealing over cuts and bruises the preparations further tend to keep moisture from working itself into the fabric.

For the benefit of the motorist who likes to do his own tinkering in so far as possible, it might be added that a satisfactory compound for coating both the inside and the outside of the shoes can be made by stirring five pounds of whitening into a quart of gasoline, and after a thorough mixing has been effected, adding a quart of rubber cement. The cold patch cement sold by nearly every tire company will do. This latter is the rubber part of the mixture. Once thoroughly mixed, the compound is applied with a brush like any other paint, and due to the elasticity imparted by the rubber cement, the paint will not crack after it is applied to the shoe.

Wheels Sometimes Cause Excessive Wear on Tire

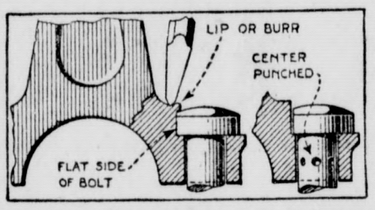
Whenever a motorist detects his tires undergoing unusual tread wear he should at once make certain that the wheels are true. Disalignment of wheels is the unsuspected cause of the premature demise of many tires. When the wheels of a car are not parallel, the tire must undergo a diagonal grind as it passes over the road surface. Sometimes an axle becomes bent by a severe blow, or the steering apparatus gets out of adjustment. Often demountable rims are not put on straight. Bearings sometimes become worn and permit the wheels to wabble. In any case the tread soon grinds off and the fabric of the tire is exposed to many destructive agencies.

By close observation you can distinguish many cars being driven with wheels perceptibly out of true. In numerous instances the motorist is not aware that his tires are being subjected to abnormal wear until the announcement comes in form of a worn-off tread or a blowout.

After your car has received a hard bump you should see at once that the axles have not been bent or the wheels knocked out of true. Your tire dealer or garageman will usually be pleased to examine them, or if his service does not cover this, will suggest where it can be done.

Fitting Connecting-Rod Bearing on Crankcase

When fitting connecting-rod bearings, the bolts have an annoying tendency of falling down inside the crankcase. This can be prevented in the two ways shown in the illustration. One of these consists of turning a burr over the head of the bolt with a chisel or center punch. A small burr is all that is necessary. A second method is to make a ring of center-punch marks around the shank. These marks should be placed half-way through the bolt hole to allow the bolt to pivot slightly if necessary, to accommodate the cap. Bolts so remedied are driven into their holes with a light driving fit and make a neat, serviceable job.—Popular Science Monthly.



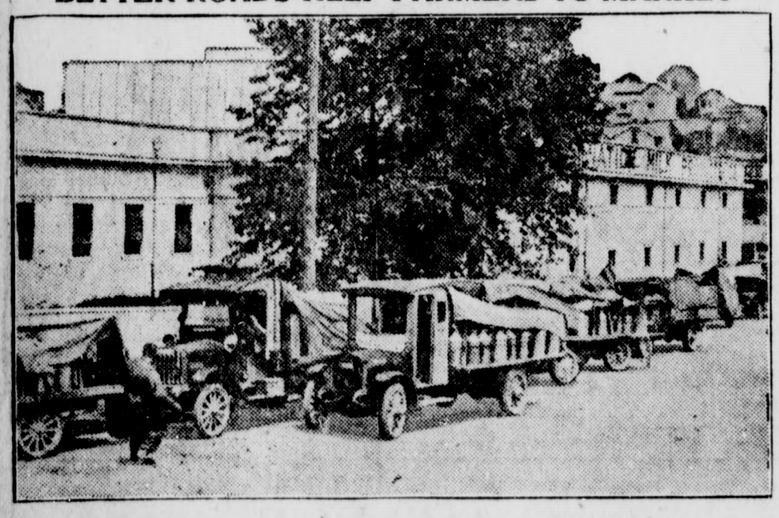
Two Ways to Hold Bolts in Place.

Road Hogs Not Popular With Average Motorist

If motorists would learn the rules of the road, always bearing in mind to share the road with other users of the highway and "keeping to the right," there would be fewer accidents. Hogging the road is the cause of many accidents, particularly at turns.

Carelessness is particularly noticeable at turns. It is no easy matter to turn corners at speed prescribed by law, and novices should practice traveling at low speed just before reaching corners and before making the turn at a speed not more than four miles an hour. Drivers should always signal by waving the hand which way the car is to turn or when it is to come to a stop. In making a turn on a country road, where the motorist cannot see beyond the turn, unusual precaution should be taken. Too many motorists make these turns with their machines far over the middle of the road, thereby endangering the other fellow, who frequently is doing the same thing on the opposite side of the turn. It is well to remember that half of the road is yours and the other half belongs to the other motorist.

BETTER ROADS HELP FARMERS TO MARKET



Three hundred and seventeen truck loads of live stock rolling into the South St. Paul market on a single day recently set a new peak in stockyards' history and brought additional figures indicating that Minnesota's better highways are fast becoming more and more the "farmers' railroads."

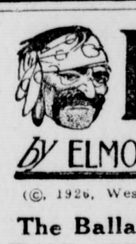
During last year, 375,881 head of live stock in 47,337 motor trucks arrived over the highways, mainly the trunk routes, at the South St. Paul market, according to official figures from the Union Stock Yards company. The average haul was placed between 60 and 70 miles, the report added, but farmers living as far as 200 miles away found it to their profit and advantage to ship by truck on the better roads.

Twenty-five years ago farmers wagons or driving them in. Some comparative figures follow:

Stock	1900	1919	1924	1925
Cattle	$ 5,497	$17,384	$ 33,708	$ 50,643
Hogs	5,484	26,689	150,614	218,640
Calves	414	7,127	47,831	76,623
Sheep	4,671	3,545	21,572	29,975
Totals	$16,066	$54,745	$253,725	$375,881

The 47,337 truck loads received at the market last year was comparable to 34,431 loads by truck during 1924, the previous high mark. Unloading facilities for truck trade at the stockyards are again virtually up to capacity, the stockyards officials said, but will be enlarged as required to serve the constantly and rapidly increasing business of this kind.

While no figures were available as to the value of the stock moved by



LOOT!

BY ELMO SCOTT WATSON

(©, 1926, Western Newspaper Union.)

The Ballad of Captain Kidd

CAPT. WILLIAM KIDD, perhaps the most famous pirate of all time, was hanged at Wapping, England on May 23, 1701. Popular feeling, evidently sensing what was established as historical fact 200 years later—that an innocent man went to his death at Execution dock that day—immediately made a martyr of him and he became the hero of a popular ballad which, like so many other ballads, grew and grew as each singer added his contribution to it. There are known to be at least 24 stanzas to the ballad, and possibly more. It is a typical example of balladry and perhaps the most famous of all ballads in which a pirate is the hero. Curiously enough William Kidd was always called Robert Kidd by the populace, and here is a part of the ballad as it was then sung:

My name was Robert Kidd, when I sailed, when I sailed,
My name was Robert Kidd, when I sailed,
My name was Robert Kidd,
God's laws I did forbid,
And so wickedly I did, when I sailed.

My parents taught me well, when I sailed, when I sailed,
My parents taught me well, when I sailed,
My parents taught me well,
To shun the gates of hell,
But 'gainst them I rebelled, when I sailed.

I'd a Bible in my hand, when I sailed, when I sailed,
I'd a Bible in my hand when I sailed,
I'd a Bible in my hand,
By my father's great command,
And sunk it in the sand, when I sailed.

I spied the ships of Spain, as I sailed, as I sailed,
I spied the ships of Spain as I sailed,
I spied the ships of Spain,
I fired on them amain,
'Til most of them was slain, as I sailed.

I'd ninety bars of gold, as I sailed, as I sailed,
I'd ninety bars of gold, as I sailed,
I'd ninety bars of gold,
And dollars manifold,
With riches uncontrolled, as I sailed.

To Execution dock I must go, I must go,
To Execution dock I must go,
To Execution dock,
Will many thousands flock,
But I must bear the shock, and must die.

Come all ye, young and old, see me die, see me die,
Come all ye, young and old, see me die,
Come all ye, young and old,
You're welcome to my gold,
For by it I've lost my soul, and must die.

Take warning now by me, for I must die, for I must die,
Take warning now by me, for I must die,
Take warning now by me,
And shun bad company,
Lest you come to hell with me, for I die.

"The Mildest Manner'd Man That Ever Cut a Throat"

WHEN in 1696 William Kidd set forth from England with a royal warrant to hunt down certain "wicked and ill-disposed pirates," one of those specifically mentioned was a certain Capt. Thomas Tew or Too, a native of Rhode Island whose headquarters were on Madagascar. Captain Tew had originally sailed from the Barbados with Captain Dew under a privateering commission, but Tew and his men turned pirate and sailed to the Red sea.

Here he met a ship engaged in the Indian trade and found her a rich prize so that each of his men received 3,000 pounds sterling as his share of the loot. Then they returned to Madagascar, the lair of pirates in the Orient, and Captain Tew's position with these gentry was firmly established. At one time he joined with the famous French pirate, Misson, originator of "piracy-without-tears," at his Utopian city of Libertatia, but a quarrel between the French and English pirates threatened to wreck that peaceful republic.

A duel was arranged between the two leaders but it was averted by another pirate leader, an Italian, and the trouble was settled by Tew being appointed admiral and the diplomatic Italian, secretary of state for the little republic. In fact, Tew soon acquired such a reputation for being a kind and gentlemanly pirate that ships, when they learned who their assailant was, gave themselves up without resistance.

Misson's Utopian colony finally broke up and the French leader and Captain Tew went their separate ways. Tew returned to Rhode Island, where he settled down for awhile and engaged in honest shipping enterprises. But the call of the sea and the lure of "going on account" was too much for him to resist and in a short time he consented to take a pirate ship to the Red sea.

Arriving there, Tew attacked a big ship belonging to the Great Mogul and in the desperate battle which followed he was mortally wounded. An old historian tells with grewsome detail of the wounding of the pirate leader and how, almost disemboweled, he kept up the fight as long as he was able to stand. Then, when he dropped, his men surrendered forthwith.

Thus did this famous pirate cheat the gallows in Execution dock, but he left behind him a name for courage and a certain degree of decency which is strongly in contrast to the careers of so many pirates of his day. To him might well have been applied Byron's famous characterization, "He

Daddy's Evening Fairy Tale

REPORT CARDS

In the town of Reven-Saw the children and their parents changed places.

The parents took the places of the children and the children took the places of the parents. They even grew to look like each other.

The parents had thought it would be fun to be children for a while with nothing to worry them, and the children had thought it would be fun to be parents and to do the disciplining and attending to everything.

The parents went to school and the children stayed home and did the work of parents. These new parents were called by their own names, with "parent" before each name, and the new children were called by their own last names with "Mother" or "Daddy" before it, so that Mrs. Fenwick, who had been the parent, was now little Mother Fenwick and her daughter Sally was called Parent Sally.

The teachers sent home the children's reports by the children themselves and it was a very solemn evening in almost every home in Reven-Saw when the parents looked at the report cards. None of the children did as well as their parents thought they should have done. Not one.

Little Mother Fenwick's report card was quite good as far as her lessons were concerned and little Mother Fenwick hoped her parents would be so pleased with that that they would not notice what her teacher had written down in the corner in ink:

"Little Mother Fenwick is an apt pupil and would be a pride to the school if it were not for her habit of talking too much. She is constantly interrupting and whispering and while it does not affect her own work in particular it is bad for the school and for the other pupils."

Parent Sally's face was very grave when she saw this, as she did, the very first thing!

"Mother Fenwick," she said, "I'm sorry to see what your teacher has written. I wouldn't blame you if you weren't good in all your lessons.

"Some lessons are hard to learn, and take time, but any child can be good. To think that a child of mine

Parent Sally's Face Was Very Grave.

has to have the teacher write in ink on her report card additional words about her conduct."

"I did well in my lessons," Mother Fenwick protested.

"True, my child, and I would be pleased about that. Only this news of your conduct takes away my pleasure."

Parent Robert was talking to little Daddy Fenwick.

"What's this? What's this? You—a banker's son, and your arithmetic is just above the pass mark. Surely you could do better than that! This is anything but good news."

Altogether it was a dismal night and when the little Mothers and Daddies compared notes the next day it semed as though no one had had an exactly pleasant and jolly evening.

Some time after this came word that some of the relatives were coming to visit. The new parents were quite upset. The visiting relatives had stayed away for a long time because they had thought everything would be too upset for their nerves.

Now that they had not heard of anything particularly upsetting happening in Reven-Saw they had decided to satisfy their curiosity and see how all was turning out.

The parents, however, wrote and asked the relatives to wait until the school's examinations were over and the big pageant which would immediately follow. The relatives, somewhat hurt, agreed.

The parents could tell that from their letters and it made them feel a little uncomfortable and as though they should have let them come at once in spite of the confusion.

Still, it was better this way, even though some of the relatives found it hard to understand.

Ups and Downs

Mother—Did you call Mary up this morning?

Daughter—Yes, but she wasn't down.

Mother—But why didn't you call her down?

Daughter—Because she wasn't up.

Mother—Then call her up now and call her down for not being down when you called her up.

Ever Hear This Kind?

A small miss was allowed to hold a baby chick. She held it up to her face to feel the soft down.

"O-o-o!" she exclaimed, eyes large with wonder and excitement, "I can

I find so much of goodness still;
In men whom men pronounce divine
I find so much of sin and blot,
I hesitate to draw the line
Where God has not."

CHOCOLATE

Chocolate and cocoa are almost universally well liked. They may be served in various ways.

Adding a tablespoonful or two of cocoa to a cake or pudding will give a different flavor. One-fourth cupful of cocoa added to an angel food recipe will make a most tasty chocolate cake.

Cocoa Tutti-Frutti Cream.—Use the following recipe for cocoa cream, adding one cupful of macaroons which have been dried and pounded, one cupful of candied cherries, cut into small pieces, one-half dozen marshmallows cut into bits, one-half dozen raisins, one tablespoonful of citron and the same of orange peel chopped fine; add the last just before putting into molds.

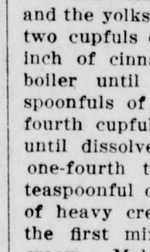
Cocoa Cream.—Mix one-half cupful of cocoa with one-half cupful of sugar and the yolks of two eggs, beaten; add two cupfuls of cream and one-fourth-inch of cinnamon; cook in a double boiler until thick. Add two tablespoonfuls of gelatin softened in one-fourth cupful of cold water, and stir until dissolved over hot water. Add one-fourth teaspoonful of salt, one teaspoonful of vanilla and one cupful of heavy cream, beaten thick. Cool the first mixture before adding the cream. Mold and chill; serve with cream.

Chestnuts With Chocolate Cream.—Boil one quart of large chestnuts, remove the shells and press through a ricer; add four tablespoonfuls of powdered sugar, one-half teaspoonful of salt, four tablespoonfuls of cream and three tablespoonfuls of maraschino sirup. Whip one cupful of heavy cream, add two tablespoonfuls of maraschino sirup, three of powdered sugar and four of melted chocolate. Fill molds with the blended mixture; chill and serve with a garnish of chopped nuts.

A chocolate sauce to serve on ice cream seems to be especially well liked. Here is a good one:

Good Things to Eat.

Salads are always acceptable and those a little out of the ordinary will never lack a welcome.



Italian Salad.—Cut one carrot and one turnip into slices and cook in boiling broth until tender. When cold add two cold boiled potatoes and one cooked beet cut into strips. Mix all together with a tablespoonful of scraped onion and pour over the following sauce:

Lombardy Sauce.—Cook one-fourth of a cupful of flour in one-fourth of a cupful of melted butter, add one-half teaspoonful of salt, one-fourth teaspoonful of paprika and one cupful of jellied chicken broth; stir until boiling hot. Set over boiling water and beat in one-fourth of a cupful of butter, beaten with two egg yolks and the juice of half a lemon. As soon as the egg is cooked beat in three-fourths of a cupful of thick tomato sauce. When cold and ready to use, add one teaspoonful of parsley chopped very fine.

Fried Onions and Apples.—Slice two onions very thin and cook in a tablespoonful of hot fat until yellow, then add half a dozen sliced tart apples: cook until soft, adding a bit of water and fat if needed. Just before serving add a teaspoonful of sugar. Serve with roast pork, sausages or chops. If the onions are not liked, slice the apples after coring without peeling and fry in a little hot fat, turning until well browned. Sprinkle a little sugar over them—that helps to make a nice brown. Serve in overlapping slices around the platter of meat.

Dinner Salad.—Remove the sections from grapefruit and take off the connection tissue. Arrange on crisp lettuce, sprinkle with finely shredded green peppers and serve with mayonnaise dressing, or a good, well-seasoned French dressing.

A delicious cake filling is prepared with a cupful of maple sirup stirred thick with powdered sugar and used between the layers—for the top add a few chopped nuts.

Fresh Fish Salad.—Flake baked or boiled fish while hot. For a pint of fish cut six olives very thin lengthwise; to them add a tablespoonful of capers, a teaspoonful of the pulp of an onion, half a teaspoonful of salt, a tablespoonful of lemon juice, and two tablespoonfuls of olive oil. Mix and pour over the fish; mix with a fork to avoid crushing; let stand in a cool place until ready to serve. Serve on lettuce leaves with mayonnaise, passed in a bowl. Garnish with pickled beets.

Raisin Fruit Cake.—Pour one cupful of boiling water over one pound of raisins, let stand for twenty minutes and then drain. To one cupful of sugar add one-fourth cupful of butter, one egg, one teaspoonful each of soda, nutmeg and baking powder. Add one-half cupful of sour milk and flour to make a batter, adding the raisins last. Bake in a loaf in a slow oven.

MOTHER OF SEVEN CHILDREN

Helped in Caring for them by Taking Lydia E. Pinkham's Vegetable Compound

Glasgow, Ky.—"I am the mother of seven children, the eldest being only 12 years, and I feel that Lydia E. Pinkham's Vegetable Compound has helped to pull me through the roughest places of my married life. At one time I was so downhearted that life was a misery. A friend in Indianapolis, Indiana, told me of the Vegetable Compound, and after taking a few bottles of it I became myself again and it was a pleasure to do my housework and gardening. Since then I always use your medicine when I feel weak from overwork and it straightens me out."—Mrs. Melissa Barders, Route 2, care of O. F. Steenbergen, Glasgow, Ky.

New Orleans, La.—"I could not do a thing after my first boy was born. I was so weak, I had no appetite, lost weight and was not able to do my work. I was this way for seven weeks, then I took Lydia E. Pinkham's Vegetable Compound and got wonderful results from it."—Mrs. C. Faubie, 4014 Dauphine St., New Orleans, La.

Lydia E. Pinkham's Vegetable Compound has been growing in popularity among women for over fifty years.

Coach Shows Thomas Some Tricks

Photograph, taken at the Senators' training camp in Tampa, Fla., shows Nick Altrock, Washington comedian, at left, showing "Lefty" Thomas, promising southpaw recruit, how to hold the ball for a certain throw.

French Tennis Star

Rene Lacoste, French tennis champion, who was summoned to the colors after the Davis cup matches last year and who has received a leave of absence and is now in the United States playing in different matches.

Sporting Squibs

Baseball teams in the American league used 34,164 balls last year.

* * *

"Aye, there's the rub," as Hamlet might have said of the big league resin controversy.

* * *

The late Christy Mathewson pitched no fewer than 74 shut-out games during his baseball career.

* * *

These should be great days for the resin interests, what with the National league's new ruling, and old-time fiddlers.

* * *

Reed Smoot, United States senator, was a pitcher on the first professional baseball team organized in the state of Utah.

* * *

The American golf player uses an average of about 200 balls per season, or around 1,000,000,000 balls for all players.

* * *

Mr. Dempsey flits busily about the country, yet fails to create the impression that he is working at his profession.

* * *

Louis Wagner, a semi-pro pitcher from New York city, has signed with Martinsburg of the Blue Ridge league. He is a right-hander.

* * *

While Babe Ruth may not swing the biggest bat in the world, nevertheless any American league pitcher will tell you it is big enough.

* * *

San Francisco Yacht club will build a $100,000 clubhouse. It is the oldest yacht club on the Pacific coast, having just celebrated its fifty-ninth anniversary.

* * *

Bob Shawkey will assist in coaching pitchers this year, as well as take an occasional fling at the hill, according to Manager Miller Huggins of the Yankees.

* * *

After 16 years' competition as an amateur, Joie Ray has signed a contract to turn professional runner. He is planning a European trip with exhibitions in London, Paris and Berlin.

* * *

Ty Cobb of the Tigers, though he was in 101 games in center field, only got in one double play throughout the 1925 season. He had 260 putouts, 9 assists and 14 errors for a percentage of .951.

* * *

C. H. Thomas, secretary of the Columbus American association baseball team, announced that Catcher Luke Urban of the Senators had been traded to Toledo for outfielder Paul Strand.

Sport Notes

Florida has nearly 150 golf courses.

* * *

Frank Philbin, third baseman of the Little Rock club, has been sold to Kansas City.

* * *

Leo Dickerman, lanky Cardinal right-hand pitcher, has been released outright to the Syracuse club.

* * *

Stanislaus Zbyszko, who continues in the front rank of the heavyweight wrestlers, is now in his sixtieth year.

* * *

In Greater New York there are 65 schools playing soccer football, with 745 class elevens and 7,500 lads on the teams.

* * *

Thirteen fighters have held the bantamweight championship since George Dixon relinquished the title in 1894.

* * *

It is just 30 years since the American team carried off high honors in the first revival of the Olympic games at Athens.

* * *

Louis Fonseca, former Cincinnati infielder, has been sold by the Philadelphia Nationals to the Newark Internationals.

* * *

George W. Hauser, assistant football coach at Iowa State college, has accepted a two-year contract to become head coach at Colgate.

* * *

Harry (Hi) Myers, outfielder with the St. Louis Cardinals baseball club, was given his unconditional release under the ten-year rule.

* * *

There are nine classes of fighters: Flyweights, bantamweights, featherweights, junior lightweights, lightweights, welterweights, middleweights, light-heavyweights and heavyweights.

* * *

Jack Knight, former Oakland infielder, has been signed for a utility role on the Sacramento Coast league baseball club, it has been learned. Knight played first base for Denver last year and batted .352.

* * *

Pitcher Bill Plummer has been sent to Omaha of the Western league, by the Seattle club on option. This was in accordance with the arrangement by which Omaha sold Pitcher Harry Lee to the Coast League club.

* * *

The largest purse Red Grange has received since he became a professional, between $45,000 and $50,000, was for a football game in Los Angeles between Chicago Bears and the Los Angeles Tigers. More than 75,000 fans attended the game.

Peppery Babe Pinelli

Peppery Babe Pinelli is an important cog in the Cincinnati Reds' machine for the National league pennant this year because of his hard hitting, clever fielding and aggressiveness.

BASEBALL GAINING HOLD ON BRITAIN

Becoming Popular in Liverpool and Newport.

Baseball at last appears to have taken a firm hold in certain sections of Great Britain, and the past season saw more progress than ever before, according to comments by London sporting authorities and writers. Especially has great progress during the past year been noted in Liverpool and south Wales.

Most of the baseball clubs in south Wales are to be found in the thickly populated districts, and Cardiff has become the real stronghold of the game. The progress it has made in the Welsh metropolis is largely attributable to the fact that during the war the United States authorities had a large depot in the city. It is held that the game is more exciting than cricket and that a decision is arrived at in far less time than in the case of the older game.

Certain it is that the athletes of south Wales and of Cardiff and Newport in particular, have seized on baseball as the best substitute for football during the off season of the great winter game. Cardiff supports four baseball leagues, one of which is a women's league. Exponents of the game invariably play their matches on pitches in the public parks. A number of the cricket clubs have inclosed grounds and are able to charge admission. It is no uncommon thing, according to one London critic, to see crowds of from 3,000 to 5,000 watching a baseball game in Cardiff.

Newport also has its thousands of enthusiasts and claims credit for being the pioneer of the American game in south Wales. There were strong teams in the Uskside town long before the war. In south Wales football players consider baseball a better game for keeping themselves in condition during the summer than cricket and it is thought probable that their participation in baseball has materially increased its popularity.

In Liverpool the view also is taken that the game is far faster than cricket and workers are being lured in increasing numbers to baseball parks on Saturday afternoons. For years Liverpool has been almost alone among the centers of the north in its adherence to the game, but new clubs are springing up in the surrounding districts of St. Helens, Prescott and the Wirral.

Yale's Swim Star

Photograph shows J. D. Bronson, Jr., Yale '26, of Stillwater, Minn., who is captain of the Yale university swimming team, and who on February 19 set a new intercollegiate record when he made a sprint of 50 yards in 23 3-5 seconds.

Cricket Fans Disturbed Over Lively Ball Hint

Quite a flurry has been caused in Australian cricket circles since Mailey raised the question of lifting the seam of the ball, with the result that a lively discussion has arisen as to the advisability of definitely establishing a rule against artificial aids that are likely to give an advantage to a bowler to which he is not considered entitled. Bob Crockett, who has umpired the test and other big matches for 32 years, and who is regarded as the greatest authority on Australian cricket, when interviewed on the subject, is quoted as saying:

"I cannot understand what all the discussion is about. I have not seen one bowler lift a seam during the past 15 years, and I am always on the lookout for such things. Mailey certainly did not do it. His trouble is that he gets too much break on the ball.

"Bowlers nowadays are more anxious to keep the ball smooth than make it rough. Douglas often rubbed the ball on his arm to make it smooth. Nearly all the bowlers used resin, which they keep in their pockets, and against which there is no rule. Few of the present-day bowlers rub the ball on the ground. Formerly bowlers, particularly Noble, liked the ball a little rough, but the custom has died out. One thing, despite its legitimacy, which annoyed bowlers, was the sticky mixture wicket-keepers used on their gloves. That was much more useful to a wicket-keeper than resin to a bowler."

She Didn't Care

We had been going together for about six months. One Sunday afternoon in the fall we were out walking in a new addition of the city, where many young couples lived. As we passed one newly built house, I said, "There is one house that young married people won't live in, because it has no heating plant."

She immediately turned to me, and, putting her hand on mine, said: "O, that wouldn't make any difference to me; I could get along with a stove."

We are now married, but do not live in the house that has caused all our happiness.—K. P., in Chicago Tribune.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful what Cuticura will do for poor complexions, dandruff, itching and red, rough hands.—Advertisement.

The First Cuckoo

A certain minister in a remote Highland district last year thought he would introduce an innovation into the Watch Night service, and brought into the church a cuckoo clock. It had not the effect he had expected, which was of solemnizing the occasion. As the cuckoo began to strike, the village lads at the back started to accompany it, and by the end of the twelfth sound pandemonium reigned, and the service had to be abruptly closed. The experiment will not be repeated this year.

For economy's sake, why not buy a vermifuge which expels Worms or Tapeworm with a single dose? Dr. Peery's "Dead Shot" does it. 372 Pearl St., N. Y. Adv.

Full Moon and Baldness

Theodore H. Morgan, a federal customs inspector at Philadelphia, adopted the policy of having his hair cut only when the moon was full, as a means of warding off baldness and he asserts the effect was so noticeable that half a dozen men in his organization did likewise with good results.

All nature is but art.

Stomach or Liver Trouble?

Bakersfield, Calif.—"I have used Dr. Pierce's Golden Medical Discovery for poor blood, torpid liver and stomach disorder and there is nothing in the world like it to get the human machine clear of the poisons and to get every organ of the body feeling strong and healthy. I know what I am talking about for I was hardly able at times to get to my work, feeling mean, sick and rundown all the time. I have never had a return of this condition."—H. H. NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

Miss Marg O'Connor attended the Catholic Daughters of America convention last Sunday at Vallejo.

Mr. and Mrs. L. A. Ross and family have sold their home at 1127 Hanover and have moved to San Francisco.

Mr. and Mrs. L. Ross and family and Mr. and Mrs. I. Eads and family visited friends in Redwood City last Sunday.

Mr. and Mrs. John Campbell have purchased the home at 1166 Brunswick from Mr. S. Berti and are now living there.

Mr. and Mrs. Peter Langensand have purchased a new house built by E. Daniels on Templeton avenue, and are making their home there.

The next meeting of the St. Maximus Girls' Club will be held on Thursday, April 8. After the regular business meeting the girls will have a social. Miss Dorothy Godfrey has charge of the social committee.

A reorganization meeting of the St. Maximus Girls' Club was held last Tuesday in the church social hall.

The Seventh grade children went to Muir Woods Tuesday with their teacher, Miss Truber, and Professor W. J. Savage.

St. Maximus church held a very successful whist and dance last Wednesday in the Daly City Auditorium. About $485 was cleared.

Last Friday night a number of the members of the La Fiesta Club were entertained at the home of Mrs. H. O'Connor, of Evergreen avenue.

A number of the members of the La Fiesta Club are planning on giving a theatre party on Tuesday evening, April 6, at the President Theatre in San Francisco.

The Associated Firemen of San Mateo County will hold a smoker on Thursday, April 1, in the Masonic Hall, Burlingame. All firemen are invited to attend.

Don't forget the whist and social to be given by the St. Maximus Girls' Club in their club rooms adjoining the church on Tuesday evening, April 24. A good time is assured all.

Mrs. Parker, of 8 Gambetta avenue, fell down the back stairs at her home last Tuesday and injured herself somewhat. She is recovering nicely but is still confined to her bed.

A false alarm was turned in last Friday night at Box 41, at Mission street and Templeton avenue. The jokesters were seen and pursued. Just as they were nearly caught, a passing street car cut off the pursuers.

The Daughters of Israel of Congregation B'Nai Israel held their regular meeting last Thursday.

Mr. and Mrs. H. Lose and Mrs. S. Younger, of Mill Valley, visited Mr. and Mrs. H. H. Smith last Sunday.

P. Murray has been building a grocery store at Roosevelt and Hanover, and will open it in two weeks.

Company No. 2, Daly City Volunteer Fire Department, held their regular meeting last Wednesday evening.

Mrs. S. A. Landini held a whist at her home Thursday evening for the benefit of the Jefferson high school P. T. A.

All the pupils of the grammar school and of Jefferson high will enjoy a week's Easter vacation, starting Sunday, March 28.

Mrs. Fischer, of 117 Allison street, is the proud mother of a baby son, born last Thursday. Both mother and son are doing excellently.

Miss Grace Johnston was the guest of honor last Sunday at a dinner party given by Miss Tessie O'Connor at her home on Evergreen avenue.

Oscar Heyman Bros. are building twenty-two houses in Daly City on Acton between Winchester and Hanover. Ten of these are already under way.

The New Daly Theatre, after a turbulent career as a show house, is to be remodeled. A large market will be installed there, one of the features being a bakery.

On Tuesday morning the pupils of Miss Bensen's Eighth grade of the Woodrow Wilson school went swimming in the Fleischacker pool. Mr. Waub kindly took charge of them.

Anthony Compagno, one of the most popular young men of Daly City, is soon to wed Miss Mary Marino, 641 Bay street, it was learned Wednesday following the issuance of a marriage license to the young couple.

Captain Foppiano of Company No. 4, Daly City Volunteer Fire Department, and President P. Ross attended the meeting of the advisory committee of the Associated Firemen of San Mateo County, Wednesday, at San Bruno.

A number of Daly City's young people attended the dance last Sunday night at the dance pavilion at the Chutes at the Beach, which is to be run every Saturday and Sunday evening. First class music by O'Connor's Syncopators.

A whist party will be given by the St. Maximus church at the Daly City Auditorium, April 6, the game starting at 8:30. The noted balladist, Mrs. Millhauser, will sing. There will be dancing after the game. Mrs. A. Kahmann will be the chairlady.

The meeting of the drill team of El Carmelo Parlor No. 181, Native Daughters of the Golden West, will be postponed from April 2 to April 9, due to the fact that April 2 falls on Good Friday. All members are requested to be present at that meeting.

Last Tuesday evening the St. Maximus Girls' Club had a very successful meeting and social afterwards. Quite a number of new members were taken into the club. The social committee for the occasion was the club's president, Lorraine Wall, and Helen Rider, Christine Hume, Ada Johnston and Marg O'Connor.

Mrs. Katherine Nolan, of 325 Head street, Oceanview, died at her home last Saturday after a brief illness. The funeral was held Tuesday from the parlors of W. C. Lasswell & Co., funeral directors. There was a solemn requiem high mass at St. Michael's church, Oceanview. Interment was in the Holy Cross cemetery.

A number of the girls from Jefferson high went swimming in Sutro Baths last Thursday afternoon and had an excellent time. The original intention had been to go to the Fleishacker pool, but due to the cold afternoon it was changed to Sutro. Miss Anderson and Miss Albushie were in charge.

Mrs. O. Y. Woodward, of Isleton, and Mr. C. E. Hill, of Tacoma, visited with their relatives, Mrs. Mary J. Johnson and Mrs. H. L. Livingston, of Daly City. Mrs. Woodward and Mr. Hill may be remembered as daughter and son of the late J. J. Hill, pioneer merchant of Colma and assessor of San Mateo county during the seventies.

Question: Which is the best type of vacuum tube to use for receiving?
K. R.

Answer: This question cannot be easily answered. Where greatest volume is desired, use 201 A type. A storage "A" battery is needed for these, but the results are far better. For a portable set or where great volume is not needed and the owner does not wish to bother with a storage battery, the 199 tubes are best suited. Recently a number of new types have appeared on the market. The UX-120 is a dry cell amplifier. The 199 used in the last stage of a multi-tube set cannot handle the volume without distortion. The UX-120 allows an excellent dry cell set to be made. The UX-112 is a similar storage battery simplifier.

UX or UV before the number of a tube merely denotes a different type base. The UX is a new style which is becoming very popular.

The UV-200 is a storage battery amplifier. For special sets it may be used. It consumes four times the current of a UV-201A and is far harder to adjust.

The previous mentioned tubes are made by the Radio Corporation of America. The Cunningham tubes are numbered similarly, only having 100 added, i. e., a UV-201 A is a CV-301A. CV and CX and used in place of UV and UX, respectively.

These mentioned are the standard tubes and do not include odd tubes, power amplifiers or transmitting tubes.

Dr. Lee De Forest, inventor of the three-element vacuum tube and radio pioneer, has brought forth a new loud-speaker. For some time he has been working on the "Phonofilm." This is the simultaneous showing of a film and reproduction of the words for it by means of a central broadcasting station. Thus one film might show in one city at twenty different theatres. Instead of sub-titles, actors at a central broadcasting station, watching the film which would be screened simultaneously at all the shows, would speak at the proper time. This would render the film much more alive and eliminate time and film used for sub-titles.

When tried the scheme worked excellently, except for the poor reproduction of the present-day loud-speaker. It was too limited and was loud for those in front of it, but poor for those at one side. Straining was necessary to properly understand the words.

Dr. De Forest has come forth with a speaker to eliminate all this. It is in the form of a horseshoe, with the diaphragm applied tangentially, instead of at right angles, as in the usual horn. He calls his new instrument the Audalion.

A small Audalion works as well as a large one. An opening is left in the horseshoe to avoid a barrel tone. Wonderful tone, free from blasting and reasonance, is obtained from this speaker. Sound goes from it equally in all directions. The Audalion is a big step forward.

NOTICE TO CREDITORS

In the Superior Court of the State of California, in and for the County of San Mateo.

In the Matter of the Estate of Julia Timmins, Deceased.

Notice is hereby given by the undersigned executrix of the last will and testament of Julia Timmins, deceased, to the creditors of and all persons having claims against the said deceased, to file them, with the necessary vouchers, in the office of the Clerk of the Superior Court of the State of California, in and for the County of San Mateo, or to exhibit the same, with the necessary vouchers, within four months after the first publication of this notice, to the said executrix at the office of Franklin Swart, Attorney at Law, Court House, Redwood City, County of San Mateo, State of California, the same being the place for the transaction of the business of said estate in the County of San Mateo, State of Californa.

Dated, San Francisco, February 26, 1926.

Pardini & Scampini, Attorneys for Administrator.

Published in the Daly City Record five times.

First publication March 5, 1926.
Last publication April 2, 1926.

WESTERN SUGAR INDUSTRY

Sugar beet profits for Western growers in the states having refining industries are larger than ever before. One Western sugar company will pay a total of $15,000,000 to the farmers for last year's crop, the payments extending into 1926.

The fact that the money for sugar beets is distributed over a fiscal year reaching from November to November, is beneficial in enabling growers to employ labor over dull periods, and incidentally to have money for the payment of taxes.

Distribution by states shows $7,500,000 already paid in Colorado, $5,500,000 in Nebraska, $2,000,000 in Montana and Wyoming.
